

WEBVTT

1

00:00:40.970 --> 00:00:44.349

Stephen Ganetis: Not sure if you guys can hear me, but everything is muted.

2

00:02:47.590 --> 00:02:51.259

Village of Parish: I set the organization. I'm wondering just to get one on my bill

3

00:02:51.890 --> 00:02:56.449

Village of Parish: gallery and security with the, you know, the manual cover stuff.

4

00:02:56.850 --> 00:02:58.825

Village of Parish: People

5

00:03:02.340 --> 00:03:05.249

Village of Parish: add up all the individual pricing works. And what

6

00:03:06.260 --> 00:03:12.770

Village of Parish: simple proposal is a big, several \$1,000 difference without, even though, that

7

00:03:36.290 --> 00:03:41.510

Village of Parish: we've got one guy 200, and this looks like he wouldn't

8

00:03:41.580 --> 00:03:43.330

Village of Parish: who might be doing?

9

00:03:43.480 --> 00:03:56.379

Village of Parish: I think you could do a proposal for each manual.

10

00:03:57.790 --> 00:03:58.750

Village of Parish: They're not

11

00:04:00.562 --> 00:04:07.720

Village of Parish: putting all the pressure on me.

12

00:04:08.100 --> 00:04:15.639

Village of Parish: Okay, spending that much money. If we don't have

13

00:04:16.031 --> 00:04:20.129

Village of Parish: make a walk into the meeting, or am I going to test?

14

00:04:22.280 --> 00:04:24.979

Village of Parish: Yeah, let me know when you guys are rolling out.

15

00:04:27.605 --> 00:04:42.879

Village of Parish: is there? Whether 4 or 3

16

00:04:47.155 --> 00:04:55.544

Village of Parish: engineering engineering.

17

00:05:21.850 --> 00:05:29.137

Village of Parish: you know, I mean, sorry. Yeah. Bury you in those moments.

18

00:05:29.940 --> 00:05:33.290

Village of Parish: Oh, you were just kicking me there, and we were you.

19

00:05:33.630 --> 00:05:34.320

Village of Parish: God.

20

00:05:34.640 --> 00:05:36.470

Village of Parish: that married the book of achievement.

21

00:05:37.010 --> 00:05:42.749

Village of Parish: You know that my talents lie elsewhere. I can make some of, you know good

22

00:05:43.640 --> 00:05:52.749

Village of Parish: right? And then took it off. But yeah, but it's following that directions. And okay, I make a location as we approach within it in the May 15th

23

00:05:52.900 --> 00:05:55.600

Village of Parish: second that month.

24

00:05:55.700 --> 00:05:57.100

Village of Parish: Right? I

25

00:05:58.630 --> 00:06:01.289

Village of Parish: weekend for tonight. We're gonna have.

26

00:06:01.310 --> 00:06:03.599

Village of Parish: The lady is from C, 2 a. E.

27

00:06:04.300 --> 00:06:05.150

Village of Parish: Go now.

28

00:06:07.409 --> 00:06:30.610

Village of Parish: So I'm a i'm a simple engineer. I teach 2 ae

29

00:06:30.690 --> 00:06:41.654

Village of Parish: and this is Missy or Melissa Snaplin. She's 1 of our business developers on that. So we both work out of the Syracuse office. We're local and

30

00:06:42.070 --> 00:06:43.880

Village of Parish: we're glad you're working on the golf.

31

00:06:44.650 --> 00:06:55.530

Village of Parish: So we have an end there in the pitch. Yeah, I want to say where I am right now. With this.

32

00:06:55.730 --> 00:06:57.079

Village of Parish: you know, when we

33

00:06:57.640 --> 00:06:59.000

Village of Parish: Florida

34

00:06:59.550 --> 00:07:02.200

Village of Parish: 3 different people, one of them

35

00:07:02.330 --> 00:07:04.580

Village of Parish: things that you, one of the

36

00:07:05.230 --> 00:07:12.029

Village of Parish: took me technical, what it was. One of the things we scored on was the fact that we had a relationship with you

37

00:07:13.240 --> 00:07:15.760

Village of Parish: and how it was almost done.

38

00:07:17.841 --> 00:07:37.380

Village of Parish: Information. So if you could. I agree with the mayor, why don't you just contract? Cancel the contract right now? I'm kind of mad because

39

00:07:37.510 --> 00:07:42.089

Village of Parish: we had a special meeting on April 30, th which we were told

40

00:07:42.240 --> 00:07:45.010

Village of Parish: they would be starting that survey the next march.

41

00:07:45.180 --> 00:07:46.879

Village of Parish: Has that been started yet?

42

00:07:46.890 --> 00:07:57.259

Village of Parish: So we actually, we we talked to the surveyor today. That's an update. So there was an issue with the surveyor, and we had to get them with them

43

00:07:57.819 --> 00:08:22.720

Village of Parish: some consulting agreement. So that we could work with C 2 am sure. And things like that. So today accepted that agreement and that has been taken care of as of this morning. Will he be able to do his real job? Oh, yeah.

44

00:08:23.250 --> 00:08:40.301

Village of Parish: yeah, yeah. Okay. Bill Kimball is in the session or entering it. Now, okay, perfect. Yeah, so I will just let Bill go ahead and take over

45

00:08:51.280 --> 00:08:56.800

Village of Parish: same time

46

00:09:00.280 --> 00:09:02.019

Village of Parish: in the very 1st evening.

47

00:09:04.020 --> 00:09:04.610

Village of Parish: Minute.

48

00:09:06.610 --> 00:09:09.019

Village of Parish: Yes, the mayor hasn't signed yet.

49

00:09:16.500 --> 00:09:18.770

Village of Parish: So are you in the meeting.

50

00:09:22.350 --> 00:09:23.120

Village of Parish: Bill, are you.

51

00:09:27.130 --> 00:09:28.350

Bill Kimble: Yes, I can hear you.

52

00:09:30.040 --> 00:09:31.970

Village of Parish: Hello, you!

53

00:09:32.572 --> 00:09:41.640

Village of Parish: I don't know. It's it's our we have the floor so you can go ahead and and go ahead and give the updates.

54

00:09:42.120 --> 00:09:53.899

Bill Kimble: Okay, yeah, again. And Macy and Missy are there too. So we'll probably between the 3 of us, we can give you an update. So we wanted to provide just the project update for you. Let me know if I'm my

55

00:09:53.920 --> 00:09:58.929

Bill Kimble: message here, or you know my voice is breaking up or anything's breaking up. So

56

00:09:59.601 --> 00:10:01.759

Bill Kimble: the wastewater treatment plan project.

57

00:10:01.820 --> 00:10:05.039

Bill Kimble: Obviously, the construction documents are are

58

00:10:05.100 --> 00:10:11.640

Bill Kimble: 99 plus percent complete. We've got approval from the Dec to move forward.

59

00:10:11.700 --> 00:10:19.579

Bill Kimble: You know we did have comments from them that we are currently sending a response back to the Dec. On those.

60

00:10:19.680 --> 00:10:26.050

Bill Kimble: and we expect that both on the documents itself as well as the preliminary engineering report.

61

00:10:26.270 --> 00:10:33.989

Bill Kimble: So that's the state that those would be going in today, actually tomorrow. So that information will be submitted to the De C.

62

00:10:34.170 --> 00:10:36.900

Bill Kimble: The drawings and specifications again.

63

00:10:37.256 --> 00:10:41.420

Bill Kimble: have all been updated to address any comments that the Dec. Had.

64

00:10:41.450 --> 00:10:43.990

Bill Kimble: So we are expecting that

65

00:10:44.353 --> 00:10:50.829

Bill Kimble: the project will be out for bid, because the DC. Will actually have one more opportunity to review those plans.

66

00:10:50.950 --> 00:10:54.440

Bill Kimble: and so they will take some time to get back with us.

67

00:10:54.510 --> 00:10:59.830

Bill Kimble: but we anticipate the bid of that project will be in July

68

00:11:00.280 --> 00:11:06.980

Bill Kimble: here coming up so probably the late July that for construction

69

00:11:07.070 --> 00:11:10.719

Bill Kimble: award would be in October of 2024.

70

00:11:10.980 --> 00:11:36.820

Bill Kimble: And since it's a, you know, most of the wastewater treatment plant equipment and that type of work won't to, you know, be in. It takes a while to get that equipment in, so I should. I back up a half a step. My my name is Bill Kimball. I apologize. I'm the president of C. 2, ae, and I'm the individual who's be taking over on as the licensed engineer on the projects for the village.

71

00:11:36.870 --> 00:11:41.489

Bill Kimble: So I apologize for not introducing myself correctly from the get-go. So

72

00:11:41.620 --> 00:11:46.100

Bill Kimble: I've got 34 years of experience as a license engineer.

73

00:11:46.702 --> 00:12:00.800

Bill Kimble: And I'm licensed in, I think, about 7 States across the United States, including New York and Michigan and North Carolina, Georgia, several other states, and you know, across the the country itself. So

74

00:12:01.555 --> 00:12:06.960

Bill Kimble: anyhow. So I wanted to give you an update on 3 projects, one, the 1st one was being the wastewater treatment plant

75

00:12:07.020 --> 00:12:09.560

Bill Kimble: project that was the closest to the bid.

76

00:12:09.650 --> 00:12:12.799

Bill Kimble: The bid process for that one.

77

00:12:13.040 --> 00:12:22.909

Bill Kimble: Our current estimate on that project still remains the same about where it was 4 million, somewhere between 4 and 4.5 million to be the construction cost

78

00:12:23.120 --> 00:12:25.190

Bill Kimble: of the wastewater treatment plan itself.

79

00:12:25.500 --> 00:12:26.849

Bill Kimble: And so

80

00:12:27.020 --> 00:12:37.079

Bill Kimble: again, what you know. I I think I that's the the update I wanted to give on that. I guess I'll open it up for questions on the waste bar streaming plant, and then I can go into

81

00:12:37.160 --> 00:12:46.579

Bill Kimble: overview on the Ini, the inflow and infiltration study, as well as the last project which is your water system, project itself.

82

00:12:53.609 --> 00:13:09.389

Village of Parish: Well, since you're ahead of the organization, and that makes us feel good, except that also makes me worry that you gotta be a

very busy man. So if we need to call up an engineer or we don't quite agree, we're gonna have access to you.

83

00:13:09.730 --> 00:13:10.939

Bill Kimble: Yes, that's correct.

84

00:13:11.900 --> 00:13:20.409

Bill Kimble: Yup. My primary purpose today is to actually deal with clients work, you know, strictly with clients

85

00:13:20.480 --> 00:13:26.559

Bill Kimble: and others within the firm. Obviously, it's not just me. It'll be, you know. I have a hundred 30 staff.

86

00:13:26.730 --> 00:13:33.269

Bill Kimble: so there'll be a variety of people, you know, like Macy and others that will be working on your projects for sure.

87

00:13:33.320 --> 00:13:36.809

Bill Kimble: But if you've got questions I am available. Yes.

88

00:13:37.660 --> 00:13:38.430

Village of Parish: Thank you.

89

00:13:54.750 --> 00:13:56.580

Bill Kimble: Any other questions before I move on.

90

00:14:02.620 --> 00:14:04.020

Village of Parish: Basically complete.

91

00:14:04.690 --> 00:14:07.879

Village of Parish: You know, the the engineering for the new plant is based.

92

00:14:10.360 --> 00:14:12.279

Village of Parish: Greeting doesn't make sense. This is

93

00:14:20.910 --> 00:14:23.670

Village of Parish: because Bill is killing him. So

94

00:14:24.073 --> 00:14:28.310

Village of Parish: wait till it briefs it. If you wanna ask any questions first, st

95

00:14:30.092 --> 00:14:33.329

Village of Parish: Mr. Kimball, can you talk to us?

96

00:14:37.440 --> 00:14:38.559

Village of Parish: I don't know if he's hearing.

97

00:14:38.890 --> 00:14:41.200

Bill Kimble: Messages, and your bandwidth is is low.

98

00:14:41.200 --> 00:14:41.805

Village of Parish: Mother.

99

00:14:43.450 --> 00:14:46.050

Village of Parish: Yeah, we'll see you there.

100

00:14:46.110 --> 00:14:49.119

Village of Parish: Alright, Scott, I think you're back on

101

00:14:51.270 --> 00:14:52.060

Village of Parish: winds up

102

00:14:52.490 --> 00:14:54.370

Village of Parish: so we're back.

103

00:14:55.850 --> 00:14:56.739

Bill Kimble: Yeah, I can hear you now.

104

00:14:56.740 --> 00:15:03.250

Village of Parish: Yeah, okay, the design for the plan is basically complete.

105

00:15:03.490 --> 00:15:04.860

Bill Kimble: That's correct. Yup.

106

00:15:06.970 --> 00:15:07.730

Bill Kimble: Awesome.

107

00:15:08.800 --> 00:15:12.450

Village of Parish: Are we building our grandfather's sewer plant, or

108

00:15:13.160 --> 00:15:18.720

Village of Parish: something else? I was thinking about it the other day. I just rejoined the board. I wasn't here

109

00:15:19.260 --> 00:15:23.040

Village of Parish: coming into this project. I just sort of landed in it.

110

00:15:24.630 --> 00:15:27.508

Bill Kimble: Okay, yeah. I think the chosen alternative was a sequential bat.

111

00:15:27.770 --> 00:15:29.049

Village of Parish: Thought what was

112

00:15:36.170 --> 00:15:38.629

Village of Parish: well service side of the plant.

113

00:15:39.110 --> 00:15:39.870

Bill Kimble: Yeah.

114

00:15:40.610 --> 00:15:42.689

Village of Parish: You know the elect

115

00:15:44.060 --> 00:15:45.940

Village of Parish: after budget down there?

116

00:15:46.650 --> 00:15:47.889

Village of Parish: I just like

117

00:15:49.950 --> 00:15:52.630

Village of Parish: over 30 decay.

118

00:15:53.110 --> 00:15:56.970

Village of Parish: Why don't we have big ass bunch of batteries? And then we don't have to pay

119

00:15:57.320 --> 00:16:00.210

Village of Parish: the electric rate that you get

120

00:16:00.750 --> 00:16:02.359
Village of Parish: when you turn.

121
00:16:02.600 --> 00:16:05.270
Village of Parish: turn on those blowers dude

122
00:16:06.170 --> 00:16:08.559
Village of Parish: across 9 billion

123
00:16:09.190 --> 00:16:10.260
Village of Parish: dams.

124
00:16:10.620 --> 00:16:12.189
Village of Parish: The bit be cool. Yeah.

125
00:16:13.820 --> 00:16:17.500
Bill Kimble: Yeah, your voice is. Unfortunately, I'm sorry your voice is not coming through.

126
00:16:18.610 --> 00:16:22.170
Bill Kimble: I heard something about blowers at the plant, and electricity.

127
00:16:22.170 --> 00:16:41.670
Village of Parish: I think. What the can you hear me better? I think. What the question is is that we're concerned about the cost of electricity, of running the old plan. So there are newer technologies. Or is this plan included ways that we can mitigate some of the expense for the electricity.

128
00:16:42.090 --> 00:16:49.769
Bill Kimble: Yes, and I can get back. Yeah, I think you know, again, we did implement the current technologies, which will be more inefficient.

129
00:16:49.880 --> 00:16:53.869
Bill Kimble: They will be more energy energy efficient than your current technologies are.

130
00:16:54.408 --> 00:17:01.099
Bill Kimble: I can certainly send you the anticipated operation and maintenance cost which would include the electrical.

131
00:17:01.260 --> 00:17:04.439

Bill Kimble: anticipated electrical cost for the plant.

132

00:17:04.579 --> 00:17:08.740

Bill Kimble: so I don't have that in front of me right now, but I can follow up with that tomorrow.

133

00:17:12.410 --> 00:17:14.410

Village of Parish: Okay. Now, that would be

134

00:17:16.540 --> 00:17:17.279

Village of Parish: that would

135

00:17:18.420 --> 00:17:25.910

Village of Parish: would be great. That would be great. Yeah. And then the some tech technology is more costly to maintain than others.

136

00:17:26.050 --> 00:17:37.778

Village of Parish: So yeah, obviously, what we're doing for small village. And we wanna make sure that we've tried to reduce the monthly outgoing operating expenses.

137

00:17:38.230 --> 00:17:42.629

Bill Kimble: Sure. No understandable. Yeah, no. Given the size of the plant and the number of

138

00:17:42.830 --> 00:17:47.749

Bill Kimble: of people that you're serving. It's a very important to make sure the operation maintenance costs are

139

00:17:48.260 --> 00:17:49.320

Bill Kimble: affordable.

140

00:17:50.320 --> 00:17:50.879

Village of Parish: Thank you.

141

00:17:59.360 --> 00:18:03.420

Bill Kimble: Alright. The next project I wanted to bring you put an overview on, and

142

00:18:03.500 --> 00:18:07.920

Bill Kimble: is the infiltration and inflow study. So that's

143

00:18:08.210 --> 00:18:17.370

Bill Kimble: the study to kind of goes hand in hand with your wastewater treatment plant project that it goes and looks at the sanitary sewer system.

144

00:18:17.490 --> 00:18:19.929

Bill Kimble: which is obviously

145

00:18:20.270 --> 00:18:40.010

Bill Kimble: 30, you know, a lot of vitrified clay pipe is this type of system, the pipe material that you have within the system, and we've done some. Again. Preliminary analysis, on looking at the peak flows during rain events and non rain events. And what we found was

146

00:18:40.080 --> 00:18:42.999

Bill Kimble: that obviously, during rain events, you get

147

00:18:43.020 --> 00:18:46.399

Bill Kimble: your peak flows do increase significantly

148

00:18:46.756 --> 00:18:52.990

Bill Kimble: your average daily flows go from 30,000 gallons per day up to 50,000 gallons per day.

149

00:18:53.100 --> 00:18:57.119

Bill Kimble: Air peak flows are in the 80 to 90,000 gallons per day

150

00:18:57.150 --> 00:18:59.380

Bill Kimble: during that period of time. So

151

00:18:59.420 --> 00:19:00.989

Bill Kimble: we've again

152

00:19:01.626 --> 00:19:04.110

Bill Kimble: done a field inspection on

153

00:19:04.140 --> 00:19:09.979

Bill Kimble: 78 of your 93 manhole structures, sanitary manhole structures.

154

00:19:10.080 --> 00:19:12.770

Bill Kimble: There are a number of those, I think.

155

00:19:13.141 --> 00:19:18.559

Bill Kimble: that are buried that we couldn't locate, so I don't have an update. I don't know if the

156

00:19:18.700 --> 00:19:25.409

Bill Kimble: the village has been able to uncover those at this point in time, so we can complete that work. But

157

00:19:25.530 --> 00:19:28.849

Bill Kimble: that's certainly important to make sure that you have access

158

00:19:28.940 --> 00:19:31.590

Bill Kimble: to the structures that are on the sewer system.

159

00:19:31.890 --> 00:19:33.859

Village of Parish: I'm sorry. How many was that, Bill?

160

00:19:36.494 --> 00:19:43.599

Village of Parish: How many manhole were are missing so we could follow up with Camden group on on those

161

00:19:45.490 --> 00:19:46.930

Village of Parish: am I coming through.

162

00:19:47.110 --> 00:19:48.999

Bill Kimble: Little not very well, unfortunately.

163

00:19:49.000 --> 00:19:59.045

Village of Parish: Sorry. Oh, here, here. 7. Okay. 7. Therema was very good. That that's what I that's what I heard. I just wanted to double check. Okay, alright. We're we're good. Thank you.

164

00:19:59.350 --> 00:20:01.610

Bill Kimble: Okay, sorry about that. Yeah. So if we have.

165

00:20:01.610 --> 00:20:02.000

Village of Parish: No worries.

166

00:20:02.000 --> 00:20:06.779

Bill Kimble: List. Certainly I want to make sure. If we haven't provided you a list yet of a 37

167

00:20:06.840 --> 00:20:09.389

Bill Kimble: structures, I certainly can get that to you?

168

00:20:09.798 --> 00:20:12.390

Bill Kimble: So that we can make sure we get those

169

00:20:12.450 --> 00:20:23.540

Bill Kimble: they're not only important to uncover for the analysis that we're doing, but they're important in case you have a sewer backup or a, you know, a block in the sewer, and you need to be able to get access

170

00:20:23.660 --> 00:20:30.869

Bill Kimble: to those structures to be able to figure out where the blockage is. So I think that's should be a high priority for the village

171

00:20:30.990 --> 00:20:32.860

Bill Kimble: to make sure that.

172

00:20:32.870 --> 00:20:52.282

Bill Kimble: And some of those can just be under the dirt, you know. They're they're outside the roadway, and they just get, you know, people don't like seeing the manhole. So they put dirt and grass over top, and others I've seen where they unfortunately forgot to. They did a paving job on a roadway, and they forgot to bring the structure back up to the surface on the paving.

173

00:20:52.560 --> 00:20:53.070

Village of Parish: Yeah.

174

00:20:53.070 --> 00:20:58.419

Bill Kimble: Just wanna make sure that. You know, we get those uncovered and and brought back up to the surface.

175

00:20:59.197 --> 00:21:01.280

Bill Kimble: The other, a lot of.

176

00:21:01.485 --> 00:21:02.509

Village of Parish: This on the Internet? Yeah.

177

00:21:02.510 --> 00:21:08.039

Bill Kimble: Most of your system is 8 inch and 10 inch as I was saying, figured play pipe.

178

00:21:08.130 --> 00:21:13.920

Bill Kimble: It's about 17,300 feet. So just over 3 miles

179

00:21:14.150 --> 00:21:15.700

Bill Kimble: or yeah.

180

00:21:15.890 --> 00:21:26.669

Bill Kimble: just 3 and a half miles or so of a sanitary sewer. But we did. We did some calculations to determine. You know how much water was coming in from.

181

00:21:26.690 --> 00:21:35.910

Bill Kimble: you know, either leaking joints or manholes, or in some cases even direct connections to the sanitary sewer.

182

00:21:36.100 --> 00:21:48.210

Bill Kimble: And so we do believe that there would be value in probably taking the next step and doing some sewer televising where you send a camera down through the sewer

183

00:21:48.260 --> 00:21:58.520

Bill Kimble: to try to figure out where some of the more problematic areas are. And the when we, if you know when we pinpoint those areas, we can then either line those sewers

184

00:21:59.165 --> 00:22:03.660

Bill Kimble: with a spotliner or a a liner that goes inside the existing pipe.

185

00:22:03.740 --> 00:22:07.169

Bill Kimble: or maybe more cost effective just to dig up

186

00:22:07.230 --> 00:22:09.869

Bill Kimble: the small section of pipe and make the repair.

187

00:22:09.950 --> 00:22:12.509

Bill Kimble: If that's if that's the issue at hand.

188

00:22:13.000 --> 00:22:13.890

Bill Kimble: Saul.

189

00:22:14.050 --> 00:22:18.689

Bill Kimble: that's still something that needs to be done the actual televising was.

190

00:22:19.036 --> 00:22:21.899

Bill Kimble: has not been done as part of our original

191

00:22:21.920 --> 00:22:23.739

Bill Kimble: project. So

192

00:22:24.230 --> 00:22:30.769

Bill Kimble: we are. We have a preliminary version of the preliminary engineering report.

193

00:22:30.840 --> 00:22:34.920

Bill Kimble: That's the next step for us is to continue to update that report

194

00:22:34.940 --> 00:22:37.720

Bill Kimble: and bring that to its closure.

195

00:22:37.860 --> 00:22:50.150

Bill Kimble: so that one village can then request the other additional funding. You were given a planning grant in this particular case, and so we want to make sure that you get the final report

196

00:22:50.170 --> 00:22:52.719

Bill Kimble: completed, and the planning grant then, can be.

197

00:22:52.850 --> 00:22:57.189

Bill Kimble: you know, fully executed and and captured by the village.

198

00:22:58.030 --> 00:22:58.910

Bill Kimble: So

199

00:23:00.780 --> 00:23:07.950

Bill Kimble: I know that the wastewater human plant project is gonna do is gonna have some small equalization. We're gonna increase

200

00:23:08.210 --> 00:23:13.660

Bill Kimble: to be able to hold hold some flow coming into the to the plant at one of the pump stations.

201

00:23:14.291 --> 00:23:19.349

Bill Kimble: But again, it's not. I think your your removal of the

202

00:23:19.360 --> 00:23:27.099

Bill Kimble: in flow and infiltration in the system will actually have to be done, you know, to help reduce the flows

203

00:23:27.180 --> 00:23:29.249

Bill Kimble: that are coming into the plant today.

204

00:23:31.390 --> 00:23:46.049

Bill Kimble: We looked at just for not just for for discussion. Sakes. We looked at. We looked at several rain events between January and June of 2022, and we map that against the flows that the treatment plant

205

00:23:46.688 --> 00:23:50.099

Bill Kimble: was experiencing. And again, that's how we determined that

206

00:23:50.390 --> 00:23:53.619

Bill Kimble: in in the in the spring months, in the wet months

207

00:23:53.630 --> 00:23:57.059

Bill Kimble: you saw a much more significant spike in flows

208

00:23:57.080 --> 00:23:58.670

Bill Kimble: at the treatment plant.

209

00:23:59.130 --> 00:24:03.100

Bill Kimble: because the ground is saturated than you do in the summer months.

210

00:24:03.180 --> 00:24:10.980

Bill Kimble: when the ground is dry, and it rains, and the ground can actually absorb quite a bit of the rain event before it gets to the sewers. So

211

00:24:11.568 --> 00:24:15.749

Bill Kimble: there's additional work that needs to be done on the pr to wrap that up.

212

00:24:16.448 --> 00:24:25.650

Bill Kimble: But that's that's where we are with infill and info and infiltration study. So any questions on that particular project.

213

00:24:27.500 --> 00:24:31.482

Village of Parish: No, that was that was good, informative.

214

00:24:32.340 --> 00:24:38.409

Bill Kimble: Sure, the other thing that we noticed when we were doing the inspections. And some of that work is that

215

00:24:38.720 --> 00:24:43.319

Bill Kimble: the sewers need to be cleaned typically every 3 to 5 years.

216

00:24:43.450 --> 00:24:45.380

Bill Kimble: So I'm not sure what the

217

00:24:45.390 --> 00:24:49.220

Bill Kimble: current schedule for sewer cleaning is

218

00:24:49.480 --> 00:24:50.570

Bill Kimble: for the

219

00:24:50.620 --> 00:25:08.875

Bill Kimble: village. But if we do move forward with televising. Then part of the televising contract would be to clean and televise, so they would always clean the sewers ahead of the televising. So that might be. If you haven't cleaned the sewers in a long time, then that might be.

220

00:25:09.220 --> 00:25:11.589

Village of Parish: Time I've heard about cleaning

221

00:25:12.000 --> 00:25:13.150

Village of Parish: tourists.

222

00:25:16.090 --> 00:25:17.430

Bill Kimble: Yeah, the the solids based.

223

00:25:17.430 --> 00:25:20.100

Village of Parish: Involved. How do you clean a suit on a thing that we do.

224

00:25:20.550 --> 00:25:27.499

Bill Kimble: Yeah, so you, there's a there's a water jet. Basically, you use a water jet that you pull through the sewer

225

00:25:27.570 --> 00:25:29.370

Bill Kimble: that to blast the

226

00:25:30.790 --> 00:25:35.110

Bill Kimble: the water through, and then you clean the you pick up the solids at the.

227

00:25:35.110 --> 00:26:00.404

Village of Parish: As my knowledge. We've never done this, I would say, in 40 years we've never done that debating here that we none of us can remember ever cleaning the sore in the past 40 years. So probably you're right. It needs to be done. We've never done it.

228

00:26:02.680 --> 00:26:03.560

Village of Parish: Wow!

229

00:26:03.560 --> 00:26:14.619

Bill Kimble: Yeah, what happens in sewer systems is sand and believe it or not, small particles and sand and gravel and other things do get in the sewer system, and they do settle out.

230

00:26:14.620 --> 00:26:16.540

Village of Parish: Take the entire series.

231

00:26:16.540 --> 00:26:21.840

Bill Kimble: You know they don't. They start to to take up capacity, you know, of the sewer itself, and so

232

00:26:22.070 --> 00:26:26.930

Bill Kimble: sewer might have you know, an 8 inch sewer might have 3 or 4 inches of

233

00:26:27.150 --> 00:26:30.139

Bill Kimble: of, you know solids in the bottom.

234

00:26:30.240 --> 00:26:36.620

Bill Kimble: and that just that just depletes the capacity of the sewer itself. So regular cleaning

235

00:26:36.730 --> 00:26:37.940

Bill Kimble: again.

236

00:26:38.080 --> 00:26:51.519

Bill Kimble: you know. 3 to 5, 5 years is ideal. But you know, a lot of communities that I work with, or we work with are probably more on a 10 year schedule to make sure that everything gets done, you know, every 10 years or so.

237

00:26:56.700 --> 00:26:57.410

Village of Parish: Yeah.

238

00:26:58.360 --> 00:27:06.590

Bill Kimble: Alright any any next the last project that we wanted to give you an update on. And certainly I don't want, you know Macy or Missy. If you have anything, you can

239

00:27:06.630 --> 00:27:13.649

Bill Kimble: certainly jump in. I don't, wanna, you know, dominate the conversation, but I've since I'm virtually here. I do realize that.

240

00:27:13.760 --> 00:27:19.140

Bill Kimble: you know, it'd be easier for them to maybe listen to me. And then, you know, you can chime in

241

00:27:20.520 --> 00:27:34.020

Bill Kimble: the water system project. Obviously, that's the the most recent project that you have awarded to us to move forward with. That's 36,000 lineal feet of brand new ductile iron watermate.

242

00:27:34.370 --> 00:27:35.850

Bill Kimble: That's a

243

00:27:35.950 --> 00:27:40.790

Bill Kimble: obviously connection to Aqua. So we probably're gonna get the water.

244

00:27:41.497 --> 00:27:47.399

Bill Kimble: You know that net connection is going to be at New York State Route 69 A

245

00:27:47.870 --> 00:27:49.740

Bill Kimble: and Us. 11.

246

00:27:49.850 --> 00:27:58.229

Bill Kimble: So we're gonna have to obviously work with the village to create a couple of agreements water agreements to help you know. Establish that

247

00:27:58.550 --> 00:28:00.040

Bill Kimble: connection for you.

248

00:28:01.640 --> 00:28:03.859

Bill Kimble: again, there's 260

249

00:28:04.090 --> 00:28:05.800

Bill Kimble: Edu's

250

00:28:06.060 --> 00:28:08.289

Bill Kimble: on this project specifically.

251

00:28:09.040 --> 00:28:16.550

Bill Kimble: and the where we're at in the process right now. We just yesterday, or I think it was actually earlier. Today. We

252

00:28:16.820 --> 00:28:21.279

Bill Kimble: we signed a contract with a survey for topographic survey.

253

00:28:21.720 --> 00:28:30.470

Bill Kimble: But we've been. You know, we some of the things that we're gonna be doing in in addition to the topographic survey is, we can actually use existing aerial

254

00:28:30.630 --> 00:28:37.220

Bill Kimble: survey that's out there and start laying out the preliminary sewer. Or excuse me, the preliminary water main routes

255

00:28:37.893 --> 00:28:42.329

Bill Kimble: and impacts to other utilities like gas and

256

00:28:42.350 --> 00:28:47.440

Bill Kimble: electricity, and you know all the other utilities that are in the in the roadways

257

00:28:47.930 --> 00:28:49.890

Bill Kimble: or adjacent to the roadways.

258

00:28:50.470 --> 00:28:51.400

Bill Kimble: So

259

00:28:52.029 --> 00:28:58.580

Bill Kimble: in addition to the water mains. We actually have a new
Booster Water pump station

260

00:28:58.690 --> 00:29:02.530

Bill Kimble: and 260,000 gallon water tank.

261

00:29:02.850 --> 00:29:06.070

Bill Kimble: As part of this project. So it's a significant project.

262

00:29:06.350 --> 00:29:09.139

Bill Kimble: and we know it'll be a huge improvement to.

263

00:29:09.140 --> 00:29:10.629

Village of Parish: Tank. It goes where.

264

00:29:10.630 --> 00:29:11.799

Bill Kimble: To the villages.

265

00:29:12.920 --> 00:29:13.300

Village of Parish: The white.

266

00:29:13.300 --> 00:29:13.980

Bill Kimble: Working.

267

00:29:13.980 --> 00:29:15.290

Village of Parish: Tank goes where.

268

00:29:15.900 --> 00:29:20.590

Bill Kimble: Yeah, I'm not. I don't know the. I don't know if we've
pinpointed the exact location yet

269

00:29:20.950 --> 00:29:21.850

Bill Kimble: of it.

270

00:29:21.850 --> 00:29:24.150

Village of Parish: Of properties that have been

271

00:29:24.390 --> 00:29:38.987

Village of Parish: establish. I can't think of the gentleman's name, but we met with them. What's that?

272

00:29:39.900 --> 00:30:08.060

Village of Parish: Of course, handles it, thinking the same thing. One question I have, of course, is the capacity of the water pipe coming into the village.

273

00:30:08.120 --> 00:30:24.820

Village of Parish: The town supervisor kind of brought up at a joint meeting that they wanted to make sure there was enough that we there. He was kind of hinting that we're getting approval through his town. If he, if they'd be able to plug into it in the future, is there gonna be enough capacity?

274

00:30:24.820 --> 00:30:49.829

Village of Parish: Or is that extra expense which we need to see and pass on to the town supervisor. Well, that's what he's saying. If we come in, yeah, I mean, obviously, they're not. It's not an engineering question be up to the engineers to decide that, but that is one's concern if there's any extra expense for in the future, if the town.

275

00:30:49.830 --> 00:30:58.316

Village of Parish: since we're doing this as a village project. We kinda need to know that upfront. So we can not have any problem with the right of ways through the town.

276

00:30:59.030 --> 00:31:15.280

Bill Kimble: Right? Yup, yeah, no. So I think, yeah, I have to go back and look at that in terms of what the capacity is, and what it would need to be again to meet the village needs, and then what it would, what the size of that would need to be to meet both the village and the towns needs.

277

00:31:15.340 --> 00:31:16.369

Bill Kimble: and I think that's the.

278

00:31:16.760 --> 00:31:24.560

Village of Parish: I did talk to Ian about it, and he said that that would be our decision when we did it.

279

00:31:25.190 --> 00:31:25.550

Bill Kimble: Right.

280

00:31:25.550 --> 00:31:27.300

Village of Parish: Yeah, all this specification.

281

00:31:27.780 --> 00:31:31.029

Village of Parish: So that would be the size of the transmission line. Yeah.

282

00:31:32.890 --> 00:31:57.709

Village of Parish: And the the upgrade in size. We need to keep track of how much that cost us, because in the future we don't need to like 2 water pipes to perish. That's that's ridiculous. That's not cheap. Come on.

283

00:31:59.340 --> 00:32:02.380

Bill Kimble: Yeah, this is not. That's not unusual for us to.

284

00:32:02.520 --> 00:32:14.519

Bill Kimble: you know. Try to to size of a pipe a transmission pipe to not only service what you would need, but if it can pass through and and also help you know the neighboring town.

285

00:32:15.030 --> 00:32:19.750

Bill Kimble: But, as, as as mentioned, you know you should not have to pay the additional cost.

286

00:32:19.850 --> 00:32:32.250

Bill Kimble: you know, to take a water main from. Let's say it's a 12 inch to a 16 inch, or, you know, depending on what you know, what the capacities of the town are. So has the town given us already the capacities that they're looking for.

287

00:32:32.800 --> 00:32:34.499

Village of Parish: I think I think 12.

288

00:32:35.840 --> 00:32:39.890

Village of Parish: Oh, this is what Jim had told me, and I had talked to the end about it.

289

00:32:40.300 --> 00:32:46.189

Bill Kimble: Okay, yeah, we can. We? We can look in our notes to see what the what that rated capacity is.

290

00:32:46.190 --> 00:32:50.789

Village of Parish: I I will check back with the town supervisor just to make sure. That's it.

291

00:32:51.200 --> 00:32:51.930

Bill Kimble: Okay.

292

00:32:52.910 --> 00:32:53.720

Village of Parish: Yeah.

293

00:32:55.280 --> 00:32:59.699

Bill Kimble: Yeah, we certainly don't want to have 2 water mains, you know, in the same court, or you know.

294

00:32:59.980 --> 00:33:01.570

Bill Kimble: for if we can

295

00:33:01.940 --> 00:33:03.450

Bill Kimble: help a future.

296

00:33:03.450 --> 00:33:05.881

Village of Parish: Others won't do that.

297

00:33:10.838 --> 00:33:17.639

Bill Kimble: The the project schedule on that water main project or water main and Booster, Pump Station and Tank

298

00:33:17.750 --> 00:33:22.259

Bill Kimble: Project Agency Review will be November of this year. So later on

299

00:33:22.715 --> 00:33:23.750

Bill Kimble: in the fall.

300

00:33:23.850 --> 00:33:27.349

Bill Kimble: and then we're planning on putting that project out for bids in March

301

00:33:27.810 --> 00:33:29.270

Bill Kimble: of 2025

302

00:33:29.660 --> 00:33:33.180

Bill Kimble: after the agency reviews, and they go through their process.

303

00:33:33.460 --> 00:33:36.020

Bill Kimble: So there's several months it takes to go through that

304

00:33:36.570 --> 00:33:40.549

Bill Kimble: we're looking at again. Bid March 2025, and then

305

00:33:40.600 --> 00:33:42.779

Bill Kimble: it wore the contract in May

306

00:33:43.230 --> 00:33:45.080

Bill Kimble: 2025, and

307

00:33:45.690 --> 00:33:50.899

Bill Kimble: construction would be through October of 2026.

308

00:33:55.970 --> 00:33:58.832

Village of Parish: How long the water pump is still last.

309

00:34:01.480 --> 00:34:10.509

Bill Kimble: The other thing I wanted to mention is that I we I prepared a summary document that I certainly will send the village you know, on each of these projects

310

00:34:10.659 --> 00:34:14.990

Bill Kimble: the information that I'm sharing with you. So in case you didn't have a chance to jot it down.

311

00:34:15.020 --> 00:34:18.039

Bill Kimble: we'll send you, you know, a full update

312

00:34:18.310 --> 00:34:20.510

Bill Kimble: of information. So you haven't.

313

00:34:21.420 --> 00:34:22.020

Bill Kimble: Kurt.

314

00:34:22.020 --> 00:34:22.860

Village of Parish: Great thing.

315

00:34:23.150 --> 00:34:24.579

Village of Parish: Thank you, Kevin.

316

00:34:24.659 --> 00:34:26.110

Village of Parish: Thank you. Thank you.

317

00:34:27.980 --> 00:34:28.720

Village of Parish: Alright.

318

00:34:34.137 --> 00:34:56.441

Village of Parish: Macy and myself are swaggle county residents. I live exactly 11 min.

319

00:35:01.320 --> 00:35:04.502

Village of Parish: Oh, last week I heard it was warm

320

00:35:04.930 --> 00:35:06.090

Village of Parish: thing one day.

321

00:35:06.572 --> 00:35:14.087

Village of Parish: You guys cannot call me after practice only brought 4 in, but I think Jacky has.

322

00:35:15.632 --> 00:35:26.457

Village of Parish: I missed your call this morning. I had your name.

323

00:35:28.450 --> 00:35:34.181

Village of Parish: Alrighty, thank you very much for coming.

324

00:35:35.000 --> 00:35:35.780

Bill Kimble: Sorry, everyone.

325

00:35:35.780 --> 00:35:47.559

Village of Parish: Yeah, for awesome. Okay? We'll we'll see see you soon, hopefully.

326

00:35:49.300 --> 00:35:53.750

Village of Parish: And I.

327

00:35:53.750 --> 00:35:54.120

Bill Kimble: Really.

328

00:35:54.734 --> 00:35:55.349

Village of Parish: Where?

329

00:35:55.370 --> 00:35:58.420

Village of Parish: Yeah, you, too both. Thank you. Thank you. Thanks.

330

00:35:58.420 --> 00:36:00.010

Bill Kimble: Alright, thank you. Have a good evening.

331

00:36:00.510 --> 00:36:01.069

Tom Bullard: I am here.

332

00:36:01.070 --> 00:36:03.250

Village of Parish: There you go! Hey, Tom!

333

00:36:05.050 --> 00:36:05.410

Tom Bullard: Okay.

334

00:36:05.410 --> 00:36:05.960

Village of Parish: You want to.

335

00:36:05.960 --> 00:36:06.590

Tom Bullard: I listen.

336

00:36:06.590 --> 00:36:07.290

Village of Parish: I live.

337

00:36:07.290 --> 00:36:11.250

Tom Bullard: Listen with great intent. I guess that's the saying that I'd like to say

338

00:36:12.735 --> 00:36:28.529

Tom Bullard: A lot of the things that he said weren't true, but we've done Camering. We've we've we've gone out and looked at some of the possibilities with leaks. We didn't clean the the water main, as you remember from Mirabitos Marabados.

339

00:36:28.640 --> 00:36:38.320

Tom Bullard: We we flush the main from 81 all the way down it screwed up our system, but we cleaned that that pipe. We camerered. The

340

00:36:38.510 --> 00:36:48.939

Tom Bullard: West Main Street system found the manholes that that need to be fixed for. I. And I, hopefully, you guys are looking into that.

341

00:36:48.980 --> 00:36:49.795

Tom Bullard: The

342

00:36:52.850 --> 00:36:53.700

Tom Bullard: The

343

00:36:54.260 --> 00:36:58.289

Tom Bullard: flows increase a lot of times because

344

00:36:58.470 --> 00:37:08.209

Tom Bullard: people have some pumps that are hooked into the solar system. Also, roof leaders are hooked in, so when it rains, and people are pumping their basements. Now that comes into us, it's like.

345

00:37:08.460 --> 00:37:09.599

Tom Bullard: yeah. So it was.

346

00:37:09.600 --> 00:37:11.700

Village of Parish: Right, no ventilator.

347

00:37:12.400 --> 00:37:12.810

Tom Bullard: Legal.

348

00:37:12.810 --> 00:37:14.080

Village of Parish: Totally. That's something. Yeah.

349

00:37:14.080 --> 00:37:21.099

Tom Bullard: It's on your it's on your sure law, I'm sure. But in the past, in my past experience.

350

00:37:21.100 --> 00:37:22.839

Village of Parish: Grains are poor, right.

351

00:37:22.840 --> 00:37:27.160

Tom Bullard: Gone in. I've gone in, and you know we found people that have been, you know.

352

00:37:27.160 --> 00:37:28.660

Village of Parish: Just tell them you got disconnect.

353

00:37:28.660 --> 00:37:31.770

Tom Bullard: Like they disconnect you leave, they reconnect so.

354

00:37:31.770 --> 00:37:34.069

Village of Parish: Correct. Me? Okay. Well, no. No.

355

00:37:34.070 --> 00:37:37.369

Tom Bullard: My, my big concern is that we need to really.

356

00:37:37.370 --> 00:37:37.840

Village of Parish: Are.

357

00:37:37.840 --> 00:37:47.300

Tom Bullard: Focus on getting that new plan. We can look at the the eye and I, and cleaning the mains and all those other things. There's no reason for us to spend money to do that

358

00:37:47.490 --> 00:37:49.539

Tom Bullard: up front to this company.

359

00:37:49.600 --> 00:37:55.140

Tom Bullard: you know. We'll we can piecemeal it out New York for a water. They they'll do it

360

00:37:55.230 --> 00:38:02.570

Tom Bullard: rather inexpensive. You've already gotten their bill for the the last time they were here doing the camera work.

361

00:38:02.920 --> 00:38:05.880

Village of Parish: I mean, do you hear? Hear that? But the Ian is not

362

00:38:05.930 --> 00:38:08.060

Village of Parish: monitor our engineering?

363

00:38:08.150 --> 00:38:09.459

Village of Parish: I'm on Georgia.

364

00:38:09.460 --> 00:38:11.460

Tom Bullard: I didn't hear you. I didn't hear you.

365

00:38:11.460 --> 00:38:12.892
Village of Parish: That's not phone.

366
00:38:16.550 --> 00:38:18.680
Village of Parish: be it went somewhere else.

367
00:38:19.960 --> 00:38:23.479
Village of Parish: Yeah, alright. Yeah.

368
00:38:23.480 --> 00:38:24.100
Tom Bullard: Yeah, Ian.

369
00:38:24.100 --> 00:38:28.829
Village of Parish: Good partner, you have to look away from the person to hear you. Yeah.

370
00:38:28.990 --> 00:38:31.609
Village of Parish: alright. Please hold in alright. Okay.

371
00:38:31.610 --> 00:38:42.320
Tom Bullard: So what's coming up for the plant now? It's June, new new budget period. We've got to get those 2 digestors pumped out. We're gonna have to get all the Egan and have them come in. And we also.

372
00:38:42.460 --> 00:38:47.719
Tom Bullard: And again we clean out the lift stations. Every year

373
00:38:47.820 --> 00:39:10.869
Tom Bullard: we we alternate. We go this this year. It's going to be North Railroad and South Railroad we got maintenance coming in from Se. We're doing the Pm's. That's gonna be North Railroad and South Rail. I'm just gonna look at the Main Street lift station to check the impellers on the submersible bumps. Last year. We looked at it. They were kind of iffy, but they were still working fine.

374
00:39:11.242 --> 00:39:23.527
Tom Bullard: That station. There is the one that gets most of the eye and eye when there's a rain event. We we looked into that last year with rural water we went through and

375
00:39:24.010 --> 00:39:36.959
Tom Bullard: took the hours down of the pumps, and we compared it to a rain event and a non-rain event. We found that it was almost doubled. It's all. It's not tripled from that West Main Street station.

376

00:39:37.010 --> 00:39:47.479

Tom Bullard: pumping all the eye. And I that's there in that system. I there's the one of the man holes, is there by the Millers lumber. That's the one that that that's on the list. So

377

00:39:47.890 --> 00:39:49.639

Tom Bullard: we'll, we'll piecemeal that. But

378

00:39:50.320 --> 00:39:57.430

Tom Bullard: my! My thought, as far as the plant goes, and I tell everybody this, that plants on Hospice.

379

00:39:58.140 --> 00:39:59.979

Tom Bullard: and it's just, you know.

380

00:40:00.330 --> 00:40:05.469

Tom Bullard: we're we're not. We're we're. We're trying to keep things together as best we can.

381

00:40:05.862 --> 00:40:19.640

Tom Bullard: And and and it's just it's not. It's not easy now, hopefully, that the the way this engineering company's talking is that they're gonna refurbish both those tanks. And they're gonna be what they call equalization tank.

382

00:40:19.730 --> 00:40:30.279

Tom Bullard: he said he was. Gonna we're gonna hold the system. We're gonna hold it in a lift station. We're not. There's no way we can hold stuff in the lift station to delay the process. However.

383

00:40:30.300 --> 00:40:35.680

Tom Bullard: in once it comes into the plan, it's gonna go to those both, both those 2 2 tanks.

384

00:40:35.790 --> 00:40:42.169

Tom Bullard: It'll be aired. The the settle out, the debris instead. Settle up, and then I go to the sbr

385

00:40:42.596 --> 00:40:45.300

Tom Bullard: again. We need to make sure that

386

00:40:45.780 --> 00:40:51.110

Tom Bullard: the plant I I thought we'd see some prints by now. But I I don't know.

387

00:40:51.190 --> 00:40:57.509

Tom Bullard: We. This change of this change of personnel is not going to be easy for us

388

00:41:00.900 --> 00:41:02.100

Tom Bullard: other than that.

389

00:41:02.230 --> 00:41:04.130

Tom Bullard: It was a very nice day today.

390

00:41:10.985 --> 00:41:16.520

Village of Parish: I get a question? Another related. We're trying to decide about these manhole covers.

391

00:41:16.520 --> 00:41:17.260

Tom Bullard: Yes.

392

00:41:17.430 --> 00:41:20.519

Village of Parish: There's like like 5 of

393

00:41:23.060 --> 00:41:25.479

Village of Parish: home again up for repair. But

394

00:41:25.490 --> 00:41:31.510

Village of Parish: you like the proposal from Jp. Enterprises. I don't know whether you work with them, or whatever, or.

395

00:41:31.510 --> 00:41:42.390

Tom Bullard: Alright. Now we did the other man holes, and they were done exceptionally. He did an exceptional job. He's aware of how to do it

396

00:41:42.510 --> 00:41:45.709

Tom Bullard: and make it right. And and he's in his, and he's had

397

00:41:45.860 --> 00:42:01.640

Tom Bullard: a lot of experience in fixing mantles, and you can take a look at the one on Union and and the South Railroad, the the one by Mill Street there, and he and the other that did the one over by the fire department. I believe that he did that one.

398

00:42:01.640 --> 00:42:02.560

Village of Parish: Yeah, at?

399

00:42:02.560 --> 00:42:03.030

Tom Bullard: And, as you know.

400

00:42:03.030 --> 00:42:04.550

Village of Parish: My own lady.

401

00:42:04.590 --> 00:42:24.379

Village of Parish: My only question is, I mean, yeah, I agree doing great work. That's a given. However, he wants twice as much as another person is quoting the word and I'm just trying to sort out is it worth double again, you know, to make sure we had somebody with experience to doing it. And I'm I'm pondering. I don't know way to go.

402

00:42:24.380 --> 00:42:26.160

Tom Bullard: I would I would I would.

403

00:42:26.580 --> 00:42:29.650

Tom Bullard: I would say that you're going to sole source

404

00:42:30.640 --> 00:42:33.269

Tom Bullard: to Pettit, did Jake Pettit.

405

00:42:33.280 --> 00:42:37.760

Tom Bullard: because of his past experience, and is it dealing with him before

406

00:42:37.820 --> 00:42:51.580

Tom Bullard: you might be able to reach out to him? I I guess that would be illegal to say, Hey, you know this. Your prices double, but it's it's it's a board decision. I I prefer Mr. Pettit because of.

407

00:42:51.650 --> 00:42:55.340

Tom Bullard: I've known him from the past and his work that he's done in the past.

408

00:42:56.260 --> 00:43:00.509

Tom Bullard: and we need that done correctly. We cannot have a manhole

409

00:43:00.530 --> 00:43:05.829

Tom Bullard: fixed fast and then have it, just, you know, go back to leaking again.

410

00:43:08.070 --> 00:43:12.749

Tom Bullard: It's kind of important to the eye. And I it's kind of important to the to the sewer system.

411

00:43:15.900 --> 00:43:17.060

Village of Parish: Thanks for your input.

412

00:43:17.340 --> 00:43:19.219

Tom Bullard: Okay. Any questions.

413

00:43:22.470 --> 00:43:24.109

Village of Parish: Nope, that's it! Nope!

414

00:43:24.430 --> 00:43:44.617

Tom Bullard: No? Just as on a side note, the operator, Mike, is going to be going off on a medical in July. So we're going to be making some changes down there, for, as far as personnel goes, we're gonna bring Julia back from Camden. She was. She's experienced. She's she's done that plant before.

415

00:43:45.140 --> 00:43:47.349

Tom Bullard: But we wish Mike

416

00:43:47.420 --> 00:43:51.859

Tom Bullard: God speed! And hopefully he'll be back within 8 to 10 weeks.

417

00:43:55.700 --> 00:43:56.319

Village of Parish: Alrighty.

418

00:43:57.710 --> 00:44:12.887

Village of Parish: I guess we really didn't have a report, so I guess we don't need to approve it right that we accept the report.

419

00:44:14.068 --> 00:44:19.450

Village of Parish: I'll second it all in favor. Alright! Alright!

420

00:44:19.870 --> 00:44:20.290

Tom Bullard: Guys.

421

00:44:20.290 --> 00:44:26.919

Village of Parish: Alright! Thanks, thank you. Short for such short notice. Alright! Well, nothing from William

422

00:44:27.986 --> 00:44:35.519

Village of Parish: we don't have that, that was my question. Is he also, for instance, like who enforces the sewer pump

423

00:44:36.251 --> 00:44:52.826

Village of Parish: issue. I mean, if the song pump would that be the the code guide that would enforce some of the rules. That'd be tough for him, too.

424

00:44:54.020 --> 00:44:57.760

Village of Parish: It's my understanding is you have to request permission to inspect.

425

00:44:58.620 --> 00:45:16.719

Village of Parish: And if you know you're illegal, you're gonna say no. So then we can be pumping it into the grass really right? And there's just filters filters through the ground. And

426

00:45:16.820 --> 00:45:40.300

Village of Parish: I mean, I didn't want to get in a gun fight with neighbors, so have your bills go up, or something. I don't know how.

427

00:45:41.758 --> 00:45:49.415

Village of Parish: I had 43 people that got reliving to the village taxpay. So obviously they don't care about paying us who are paying crazy. So

428

00:45:50.207 --> 00:45:58.489

Village of Parish: what do you tell you this here Caroline, pay the bill? It's \$200 and

429

00:45:58.650 --> 00:46:02.765

Village of Parish: fees, so you don't have to send the Federal Government \$52 a day.

430

00:46:03.670 --> 00:46:27.229

Village of Parish: you know. They they think by getting it on their deducting to them. Maybe we could send. There might be a lot of people that just they don't understand how the system works. They have no idea.

431

00:46:27.850 --> 00:46:50.906

Village of Parish: Maybe they could just as easily run the hose out the window into the backyard, but they just don't know, so they're put into a drain maybe we could send a letter out and notice like, Hey, you know, this is costing and emphasize the fact that it's costing all of us taxpayers. Anybody who's living here a lot more money if you rent cost your landlord more money, which is increasing rent cost pump it in my backyard. But then it just run over here.

432

00:46:51.200 --> 00:46:55.045

Village of Parish: cause that's the way there might be some irrigation necessary.

433

00:46:55.440 --> 00:47:09.356

Village of Parish: but any attempt might help cut down a little. At least, I mean, there's no way

434

00:47:13.580 --> 00:47:28.600

Village of Parish: it's getting hot in here. I want to turn the air condition around. Do we have a who zoomed in there? Anyone zoomed in other than Tom, cause it might be hard for them to hear us, but we we could just scream and hear each other right

435

00:47:28.720 --> 00:47:29.410

Village of Parish: while we.

436

00:47:29.410 --> 00:47:35.549

Stephen Ganetis: I. I am all for you guys getting some air conditioning. So do what you gotta do. Don't worry about me.

437

00:47:35.550 --> 00:47:37.590

Village of Parish: I mean, we just turn it on for a little bit. And

438

00:47:37.750 --> 00:47:54.369

Village of Parish: and if we have to talk with yeah, maybe try that one back there. Do you? Do you mind? Yeah. Alright. Yeah. If you want, we could turn it back off. If not, but that way we're all more comfortable. It's we're got a lot of stuff to go over here. We're going to be here for a bit. I'm gonna miss. But Mike.

439

00:47:55.097 --> 00:47:58.439

Village of Parish: So I'm down to sleep tonight routine, so

440

00:47:58.590 --> 00:48:01.459

Village of Parish: least I don't want it to be hot and sweaty while I do it.

441

00:48:02.770 --> 00:48:15.939

Village of Parish: Hey? You have my report in front of you there no date has been set yet for the next meeting of December. The equipment might have view one in June. But one of the things you got. My 300 meeting hasn't happened yet, so we'll schedule up when that happens.

442

00:48:16.300 --> 00:48:22.980

Village of Parish: I got permission meeting scheduled for Monday, June 17, th in Denmark. We can reschedule. Monday, July 15.th

443

00:48:23.340 --> 00:48:34.410

Village of Parish: I have a different office in the front of the Recreation Guide for you. We did a revised version of the project cover on the contents are, changed slightly, and if you run out of those I can thank you more.

444

00:48:35.278 --> 00:48:48.410

Village of Parish: As required by this day that posted a copy of the 2024 tentative assistant role to the town's website, which, of course, include village property. Since the village is designated the town assessor as your assistant as well.

445

00:48:49.863 --> 00:48:54.070

Village of Parish: Nothing new to report about the status of wildlife management area payment legislation.

446

00:48:54.230 --> 00:48:56.369

Village of Parish: nothing new about salmon restoration.

447

00:48:56.780 --> 00:49:07.549

Village of Parish: The Syracuse Metropolitan Transportation Council is currently in the process of updating their long range transportation plan. And that's that second shoot I gave you. You want to participate in the survey. Of course.

448

00:49:07.620 --> 00:49:27.570

Village of Parish: Syracuse Metropolitan Transportation Council. It sends as far north to Central Square, West and row, and a lot of people go either travel to Western Row and central square, or you pass the wrong way up to parish. So you definitely have an interest in what their planning process is. Even if you don't live in that area directly. So you wanna participate in that?

449

00:49:28.080 --> 00:49:31.639

Village of Parish: If the participate in the survey, you've got the information there.

450

00:49:31.980 --> 00:49:54.637

Village of Parish: and 2 other things to mention. I was touching with the Mayor. There were some questions between the village board, the town board and the planning board about the status of the comprehensive plan update, and who had done what needed yet to do. And the mayor did some research and found out that the village board had, in fact, acted on that last September, and it's 10 min apparently.

451

00:49:55.240 --> 00:49:59.310

Village of Parish: However, you have some new members of the village board since then, and

452

00:50:00.010 --> 00:50:13.530

Village of Parish: we talked about having Matt Johnson and Doug Hill work with the parish Planning board doing this update talk to talk about having met this meeting and the Tom Board meeting, but whether you're moving your meeting night this month

453

00:50:14.070 --> 00:50:17.760

Village of Parish: had a conflict, but he is going to be at the meeting on Thursday.

454

00:50:18.531 --> 00:50:23.489

Village of Parish: probably via zoom. So if you're interested in finding out more.

455

00:50:25.390 --> 00:50:26.280

Village of Parish: I'll

456

00:50:27.210 --> 00:50:27.990

Village of Parish: the

457

00:50:28.200 --> 00:50:30.460

Village of Parish: conference plan update

458

00:50:30.600 --> 00:50:31.420

Village of Parish: of

459

00:50:32.700 --> 00:50:34.100

Village of Parish: up, up, up.

460

00:50:35.360 --> 00:50:39.620

Village of Parish: and where that stand. And and he's in range to be on the Octet website.

461

00:50:39.770 --> 00:50:42.120

Village of Parish: And one other thing I'll pass along.

462

00:50:42.260 --> 00:50:57.200

Village of Parish: You noted a couple of minutes ago that we had unstable zoom connection because of bandwidth problems. So your new consultant might want to take a look at that. It's already on the the roster. Once the new server is all set up. That is the town clerk

463

00:50:58.220 --> 00:50:59.250

Village of Parish: or the

464

00:50:59.690 --> 00:51:10.270

Village of Parish: yeah. The court clerk has it just because has mentioned it also to either hardwire, or, you know, have a have a some network connections here.

465

00:51:10.270 --> 00:51:34.448

Village of Parish: or are we gonna get enough extender range extender? One way or another. We're gonna get stable Internet out here because I know it hasn't been stable since the it was all installed.

466

00:51:35.120 --> 00:51:39.218

Village of Parish: There is a router right in there. It's it's all not true.

467

00:51:39.560 --> 00:51:53.769

Village of Parish: I think I was thinking that that one might be higher. But I'm not sure. Yeah, there are. So I believe that in there. They're hardwired. Yeah, that's what. So she she has us spoke with Dan, the it guy

468

00:51:53.770 --> 00:52:17.051

Village of Parish: about running cable out here. So yeah, yeah, no. The the town just yeah, the cause that's beyond the scope of the initial thing. So they just have to approve the addition. It's gonna be super cheap, I mean, so I'm sure that they will absolutely approve it. And and then, you know and we will, we totally will. I mean, we're not. Gonna we're not gonna hinder anything.

469

00:52:17.370 --> 00:52:18.580

Village of Parish: Yep, yep.

470

00:52:18.939 --> 00:52:45.869

Village of Parish: and thanks again. For helping coordinate with the transition and everything. Yeah, Dan ward us that email is one of those things that you. You get a whole bunch of email websites. That's the he's that. I think it's the bear of the it world as one of the bears there that that could just be very difficult and time consuming and whatnot. So I appreciate, helping facilitate, that. All

471

00:52:45.870 --> 00:52:49.300

Village of Parish: probably went about as smooth as again, because whenever something like that happens.

472

00:52:49.300 --> 00:52:56.382

Village of Parish: there are always gonna be things that you need to work out kinks working experience with the the change over. But they

473

00:52:56.720 --> 00:52:59.882

Village of Parish: he did a real good job.

474

00:53:10.990 --> 00:53:14.460

Village of Parish: Very good for all my clients. I'd like to.

475

00:53:15.854 --> 00:53:17.429

Village of Parish: I mean, yeah, make

476

00:53:17.510 --> 00:53:21.050

Village of Parish: make a motion. We accept the up.

477

00:53:24.130 --> 00:53:24.850

Village of Parish: Paul.

478

00:53:29.410 --> 00:53:30.500

Village of Parish: all up.

479

00:53:33.150 --> 00:53:34.350

Village of Parish: all in favor.

480

00:53:35.760 --> 00:53:36.790

Village of Parish: A.

481

00:53:38.020 --> 00:53:40.159

Village of Parish: I don't know which one what I think.

482

00:53:40.760 --> 00:53:41.940

Village of Parish: Truck, stop

483

00:53:42.140 --> 00:53:42.930

Village of Parish: her.

484

00:53:44.752 --> 00:53:47.057

Village of Parish: Your session

485

00:53:53.410 --> 00:53:55.270

Village of Parish: might run up for a coffee or something.

486

00:53:55.980 --> 00:53:56.680

Village of Parish: Hi!

487

00:53:56.850 --> 00:53:59.730

Village of Parish: I have no idea, but I don't think.

488

00:55:27.620 --> 00:55:30.289

Village of Parish: And so I've attended. I've been really busy.

489

00:55:30.310 --> 00:55:35.630

Village of Parish: And then I went to over to Oswego last week for that breakfast for operation. Oswego County.

490

00:55:36.170 --> 00:55:53.616

Village of Parish: and I went down the Historical Society that is coming along really nice. We have the certificate of our occupancy, so the prices and insurance will go down

491

00:55:54.690 --> 00:55:55.440

Village of Parish: up

492

00:55:57.520 --> 00:55:59.060

Village of Parish: La O,

493

00:55:59.230 --> 00:56:00.020

Village of Parish: or

494

00:56:01.910 --> 00:56:06.631

Village of Parish: I'll see the work that we knew you guys were done

495

00:56:12.900 --> 00:56:13.830

Village of Parish: people with.

496

00:56:15.580 --> 00:56:17.110

Village of Parish: I yep.

497

00:56:18.496 --> 00:56:37.590

Village of Parish: Catholic Church, he said. He's gonna do a lot of scrubbing. Then he's supposed to make it a. He told Fred that he would blacktap that so Bridget could just

498

00:56:37.680 --> 00:56:42.019

Village of Parish: screwed on over to get to her office, and he also said that he would mould

499

00:56:42.050 --> 00:57:03.509

Village of Parish: cause the kangaroo is charging them \$35 to mow the tea bank. And what's tomorrow? That's what? Because small communities are built off from. You know, people coming together involved.

500

00:57:04.540 --> 00:57:05.359

Village of Parish: What's that?

501

00:57:09.310 --> 00:57:16.599

Village of Parish: Yeah, new owner of biospherics. We talked about stuff. There's a new owner of Biosynth.

502

00:57:17.060 --> 00:57:17.790

Village of Parish: Stop!

503

00:57:18.670 --> 00:57:21.830

Village of Parish: I guess it's in the Mba. Well, until

504

00:57:23.830 --> 00:57:24.510

Village of Parish: Hi

505

00:57:24.680 --> 00:57:27.020
Village of Parish: used to meet it.

506
00:57:27.621 --> 00:57:31.410
Village of Parish: and so I had called that off.

507
00:57:32.740 --> 00:57:35.010
Village of Parish: and to find out anything.

508
00:57:35.990 --> 00:57:39.730
Village of Parish: He knew that he told me that they called. Talk to him in December

509
00:57:40.570 --> 00:57:53.609
Village of Parish: for that pilot. I'll stop there. Just make sure that we were Yup, one o'clock, or whatever an hour. There, I have to go down at one o'clock to Occ to attend something for New York State about the community development.

510
00:57:53.790 --> 00:57:54.759
Village of Parish: Well, that's right.

511
00:57:57.580 --> 00:58:00.720
Village of Parish: You're just busy, thank you, Mayor.

512
00:58:00.840 --> 00:58:07.200
Village of Parish: Yes, yes, tractor trailers parking.

513
00:58:07.650 --> 00:58:08.650
Village of Parish: I have.

514
00:58:09.200 --> 00:58:10.769
Village of Parish: Steve one

515
00:58:11.600 --> 00:58:12.880
Village of Parish: are are

516
00:58:13.350 --> 00:58:14.050
Village of Parish: got it

517
00:58:16.780 --> 00:58:18.799
Village of Parish: ramp on me

518

00:58:18.920 --> 00:58:22.460

Village of Parish: on the southbound ramp post. I don't know what that

519

01:00:05.100 --> 01:00:06.930

Village of Parish: you need a permit from the DC. To buy.

520

01:00:07.570 --> 01:00:08.240

Village of Parish: Thank.

521

01:00:09.400 --> 01:00:10.870

Village of Parish: Yes, that

522

01:00:12.450 --> 01:00:13.320

Village of Parish: burning.

523

01:00:13.470 --> 01:00:16.880

Village of Parish: Yeah. Maybe if we should turn them down. And then again.

524

01:00:17.974 --> 01:00:27.132

Village of Parish: with that concept, if you take, you cannot. If you deserve more than an acre of topsoil, you're supposed to kind of like, put it back somewhere else

525

01:00:35.210 --> 01:00:36.489

Village of Parish: and wait till it.

526

01:00:37.127 --> 01:00:41.031

Village of Parish: Wait till we get some trips with California.

527

01:01:05.440 --> 01:01:07.030

Village of Parish: I've purchased

528

01:01:07.340 --> 01:01:10.149

Village of Parish: much about that property from different people.

529

01:01:11.250 --> 01:01:14.250

Village of Parish: I'm also concerned, because

530

01:01:16.070 --> 01:01:16.980

Village of Parish: prepare for them.

531

01:01:17.586 --> 01:01:32.650

Village of Parish: It's illegal to issue a building permit for that thing. Because it's not. It doesn't have a plan to connect to the sewer. Why, the planning board approved, that I don't know you didn't. It's an unapproved building.

532

01:01:34.780 --> 01:01:38.370

Village of Parish: The officer and symmetry is like

533

01:01:40.650 --> 01:01:43.109

Village of Parish: there's no, there's no public going

534

01:01:48.140 --> 01:01:49.020

Village of Parish: be in there.

535

01:01:49.920 --> 01:01:50.809

Village of Parish: that's awesome.

536

01:01:52.060 --> 01:01:54.315

Village of Parish: I don't know anything.

537

01:01:57.960 --> 01:02:00.050

Village of Parish: Training. Cooper is not

538

01:02:07.400 --> 01:02:09.430

Village of Parish: calls me and says I'm gonna go.

539

01:02:10.424 --> 01:02:30.030

Village of Parish: But Jen, generally the person says, Okay, I'm gonna put a full bar up on my property from the county, off a county road, also

540

01:02:31.125 --> 01:02:33.419

Village of Parish: to to yeah.

541

01:02:34.870 --> 01:02:39.940

Village of Parish: to put a culvert in and cover their culvert. You may need a permit.

542

01:02:42.271 --> 01:02:55.540

Village of Parish: Let's say it's Joe Schmo's home

543

01:02:55.910 --> 01:02:56.810

Village of Parish: made

544

01:02:56.980 --> 01:03:09.060

Village of Parish: soft products. Yeah, he's gonna now, look now. And now we know your site plan issue and the county cut on the road. Now site. Now the planning boards it for site plans.

545

01:03:09.180 --> 01:03:16.550

Village of Parish: Hmm. I've been trying to find out about it any of the other roles. Are they paying their taxes?

546

01:03:16.870 --> 01:03:23.170

Village of Parish: The sewer Bill? Well, they don't have a sewer, bill, because he's more than 5 right feet off the road back on the tannery hill side.

547

01:03:23.920 --> 01:03:27.709

Village of Parish: I remember the issue. Are the houses it Canary Hill Hook, so

548

01:03:28.550 --> 01:03:31.480

Village of Parish: he's supposed, at least supposed to put a sewer in there.

549

01:03:32.320 --> 01:03:39.430

Village of Parish: If the houses on tenor. If there's a sewer on that road, they have to hook right. But there's also provisioning the sewer law that says, if you are more than

550

01:03:40.440 --> 01:03:41.809

Village of Parish: 100 feet from that.

551

01:03:46.910 --> 01:03:47.670

Village of Parish: Yes.

552

01:03:51.140 --> 01:03:51.880

Village of Parish: and how

553

01:03:55.060 --> 01:03:55.740

Village of Parish: now

554

01:03:56.460 --> 01:03:57.130
Village of Parish: at the

555

01:04:00.930 --> 01:04:01.650
Village of Parish: part.

556

01:04:03.510 --> 01:04:04.190
Village of Parish: gentlemen.

557

01:04:05.040 --> 01:04:07.590
Village of Parish: he says he is he?

558

01:04:10.000 --> 01:04:11.090
Village of Parish: He's yes.

559

01:04:15.290 --> 01:04:18.060
Village of Parish: he's on 10 of the property line.

560

01:04:18.898 --> 01:04:22.050
Village of Parish: I don't have to.

561

01:05:49.890 --> 01:05:54.279
Village of Parish: And then he was talking to the engineer, and then he said it was getting it

562

01:05:54.420 --> 01:06:06.349
Village of Parish: time of year. We we had the the paperwork for the the water project, and one of the things I noticed in there was they were charging us \$200 a pop to drill into the road.

563

01:06:07.710 --> 01:06:33.080
Village of Parish: so it's not fantastically expensive to drill a hole under the road. There's a machine machines. They they bore through anything, and they make a tennis hole. They carry the pipe along with them. They can dig the trench, I'm sure, but going under the road is a specialized machine.

564

01:06:34.080 --> 01:07:03.109
Village of Parish: Alright, but I will call them, and we'll we'll ask William, too, about the code side of things. If he hasn't paid for a permit. He's long overdue

565

01:07:03.450 --> 01:07:10.439

Village of Parish: when the CD. Comes up due in September. Is that what we just said? Yes, this is CD. Renew September first.st So you want all 3.

566

01:07:10.570 --> 01:07:17.600

Village of Parish: I'm assuming it's 300 and some odd dollars worth of interest. You want to all go into the library, and that

567

01:07:17.670 --> 01:07:19.039

Village of Parish: I will be when I

568

01:07:19.200 --> 01:07:20.899

Village of Parish: use that that

569

01:07:22.000 --> 01:07:23.260

Village of Parish: I would do.

570

01:07:23.740 --> 01:07:27.369

Village of Parish: put in a cashier's bank check because the Pm. Does not.

571

01:07:28.476 --> 01:07:33.210

Village of Parish: Okay. Alright, alright. So the actual audit

572

01:07:33.540 --> 01:07:39.059

Village of Parish: let me know when I are available to work on Larry, and then I'll be in contact with him, and

573

01:07:41.510 --> 01:07:52.476

Village of Parish: it should be the one year on it. I work 14 HA week.

574

01:07:53.960 --> 01:07:57.480

Village of Parish: so I'm usually it's my day through Wednesday.

575

01:07:58.600 --> 01:08:00.550

Village of Parish: Monday, through Wednesday.

576

01:08:01.290 --> 01:08:21.029

Village of Parish: So then he had said he would start on the 1st of July, but we not we, we know that we need to give them a 30 day notice. And now tell us what how to do this. So essentially normally, when you switch payroll, you do it on a quarterly basis, because the previous provider

577

01:08:21.410 --> 01:08:26.339

Village of Parish: takes care of the quarterly payroll tax returns it cuts down on how much work

578

01:08:26.399 --> 01:08:27.493

Village of Parish: the new

579

01:08:28.160 --> 01:08:29.630

Village of Parish: prepare has to do

580

01:08:29.710 --> 01:08:32.919

Village of Parish: so. January, after the back payroll and everything separate.

581

01:08:33.229 --> 01:08:35.430

Village of Parish: So July 1st would be the start of next quarter.

582

01:08:35.969 --> 01:08:47.839

Village of Parish: But you, the mayor and Kevin, had mentioned a 30 day contract. So the thing is, the paychecks would still be doing the quarterly. So we're not. We wouldn't be terminating all services

583

01:08:47.890 --> 01:08:57.249

Village of Parish: so they would be able to complete. You know, during July they would. During that 30 day period they'd still be providing services for the village.

584

01:08:58.487 --> 01:09:01.719

Village of Parish: And then you, you know.

585

01:09:01.810 --> 01:09:03.839

Village of Parish: you just bring payroll.

586

01:09:04.029 --> 01:09:07.830

Village of Parish: The actual payroll runs to the new payroll Provider.

587

01:09:08.509 --> 01:09:09.039

Village of Parish: But

588

01:09:10.390 --> 01:09:17.426

Village of Parish: you, someone here you had asked about him attending a board meeting, and so context here.

589

01:09:18.689 --> 01:09:44.056

Village of Parish: he was doing a favor for me and doesn't make much money at all on payroll, and he so he provides payroll services to people he does bookkeeping, for in tax returns it's part of a bundle. It saves the money rather than it. Having a separate payroll provider. He does it for almost nothing, you know. He doesn't make any money on it really at all, you know so well. He he!

590

01:09:44.700 --> 01:09:45.370

Village of Parish: Hmm!

591

01:09:45.740 --> 01:09:52.220

Village of Parish: He does so if he doesn't wanna come, he might. Well, you might not want to even do the paper

592

01:09:53.353 --> 01:10:00.480

Village of Parish: because of, and he's been doing a long time. We've now been

593

01:10:02.440 --> 01:10:16.147

Village of Parish: flagged potential trouble client, which you avoid, because, especially when you're not getting money, you know. If it was a lucrative tax client, you know, you put up with the house to do a big corporate person apologies.

594

01:10:16.740 --> 01:10:44.540

Village of Parish: you know, without clutter. Yeah, yeah, I mean. So I mean, I mean, you could tell paychecks anytime after I mean, I have to talk them back into it, but as long as you could confirm, there's no way any and nothing out of the normal scope of payroll, because I know and like I said, does a great job. He's done it for 5 years for one of my clients. He's done. He does it for 4 of my clients. It's very small, so

595

01:10:44.690 --> 01:11:07.798

Village of Parish: that's how I sold it. But if we give him a hassle. He's oops. Sorry? But yeah, yeah, yeah. So as far as the payroll. So Ij, actually just transition payroll for another client the beginning of the year. The 30 days is essentially

596

01:11:08.370 --> 01:11:29.900

Village of Parish: They want time to win you back. They're gonna have a bunch of sales reps reach out to you. They're gonna send you stuff. And and also they do like a termination thing. You gotta, you know, make it

official and stuff. It just gives them time to do that. And then they're gonna Bill, like \$75 for the month of July. Give around that as a flat fee to prepare the

597

01:11:30.310 --> 01:11:56.430

Village of Parish: to to prepare the Quarterly, and it might be more than 75. Anyway. You you just pay that last month, Bill. Normally, when you're transitioning from one to the other. You're gonna get caught with that one month where you pay the new guy to do the payroll. You pay for the payroll tax return to get completed for from the old pro provider, and that would carry us out the 3, rd either. I mean I I don't think we? You don't need to be worried about the the contract. It's just a standardized payroll contract. They're not. Gonna

598

01:11:56.430 --> 01:12:06.159

Village of Parish: they're not, gonna I mean, at at the worst they could do is just just charge us more in July for the payroll, tax preparation, or whatever like. It's not. It's not a big deal.

599

01:12:06.890 --> 01:12:08.000

Village of Parish: So I mean.

600

01:12:08.200 --> 01:12:09.900

Village of Parish: I I think

601

01:12:10.010 --> 01:12:13.260

Village of Parish: he had said that you wanted to push it till October.

602

01:12:13.400 --> 01:12:15.389

Village of Parish: We'll tell us what we should be doing.

603

01:12:15.740 --> 01:12:35.660

Village of Parish: I mean, I just with the whole that list of stuff that he has to upload. I would just do that. I mean all you gotta do for him. He just. They just need all that as soon as you can, you know before, till the July you said to the next payroll July first, st if you get him everything, and like so a lot of us are, have recent new hire phones, that'd be for it. 21, 4, etc. Those ones should be easy. They should be

604

01:12:35.680 --> 01:12:45.510

Village of Parish: easily retrievable on file, and you're you've been here for forever and ever, so you might need to give them and get a new one for you. But I know Rosemary, most of that. That's that's a big

605

01:12:45.510 --> 01:13:07.253

Village of Parish: part of the puzzle, right? There is getting the new hire forms. He's not gonna hassle you. And say, in some place, you know, a lot of firms will say, Oh, you need to give new ones dated to, you know today. I'm sure he'll as long as there's no changes on it. He'll take the ones that we're well just started recently, and so he doesn't want to complicate things, and you know, as long as you don't complicate things for him, you know it'll it'll be easy for everybody.

606

01:13:07.820 --> 01:13:08.434

Village of Parish: But

607

01:13:09.880 --> 01:13:39.101

Village of Parish: The new hire forms, and then the list of others. So you and and Kevin does the ftps he does those payments. So the control one requires him because they do that as a service for their clients. They know they take care of that myself. In New York online services. He's gonna be doing that. That's no problem. I confirmed with them that they hey? You're gonna show me what you got. He they can give you whatever document you want. Yeah, it's easy, peasy so you'll get that. You'll make the payments you just have to. Maybe.

608

01:13:39.677 --> 01:13:45.030

Village of Parish: I mean so really, it's up to you to you wanted July first.st You wanted October first.st

609

01:13:45.610 --> 01:13:46.420

Village of Parish: Well.

610

01:13:47.640 --> 01:13:49.960

Village of Parish: just decided. Hang on

611

01:13:50.010 --> 01:13:52.460

Village of Parish: January, February, March. To do in April.

612

01:13:52.510 --> 01:13:55.409

Village of Parish: April, May, and June. Taxes would be due by the end of July, anyway.

613

01:13:56.110 --> 01:14:01.869

Village of Parish: So July first, st I still have to live. July first.st Okay, it's all great done. I'll try to answer

614

01:14:01.900 --> 01:14:02.910

Village of Parish: go.

615

01:14:04.670 --> 01:14:12.905

Village of Parish: If if not, then it then it even might need to push. It had to talk him into it. So he's like, Okay, I'm like, Oh, man.

616

01:14:13.210 --> 01:14:36.789

Village of Parish: yeah, I'll I'll do my best. I am pretty good at negotiating, and you know he's super busy. So you know, he doesn't anything that he's not making much money on. That's gonna take time from him in his family.

617

01:14:36.790 --> 01:14:38.099

Village of Parish: The court officer

618

01:14:38.450 --> 01:14:49.589

Village of Parish: did the walk through. And so they're gonna get the certificate of active right now. The insurance is outrageous because no one was in it. Good. So that'll make the insurance go down. So that's good.

619

01:14:49.840 --> 01:14:54.670

Village of Parish: Alright. So now I pass off this public hearing minutes where we did

620

01:14:55.760 --> 01:14:58.390

Village of Parish: just can't pass

621

01:14:59.200 --> 01:15:03.199

Village of Parish: September. We need to do that in a regular monthly meetings.

622

01:15:03.770 --> 01:15:06.659

Village of Parish: I make a motion and we approve the cost plan.

623

01:15:07.160 --> 01:15:10.550

Village of Parish: and Teddy says I don't get the jab throws when he has one.

624

01:15:10.680 --> 01:15:12.442

Village of Parish: Who's that? Yeah.

625

01:15:27.880 --> 01:15:29.020

Village of Parish: all in favor?

626

01:15:29.120 --> 01:15:35.714

Village of Parish: Oh, well, we'll let you give Gary a chance.

627

01:15:37.800 --> 01:15:38.540

Village of Parish: Aye.

628

01:15:39.640 --> 01:15:45.690

Village of Parish: I haven't seen them. I'm I'll go present, it's up to you.

629

01:15:45.730 --> 01:15:48.330

Village of Parish: Oh, I haven't seen it. Aye, aye.

630

01:15:48.490 --> 01:15:53.624

Village of Parish: I saw it. They do a lot of work. They've been a lot of working in one area.

631

01:15:54.520 --> 01:15:55.540

Village of Parish: Just doesn't.

632

01:15:55.580 --> 01:15:59.769

Village of Parish: Alright. Okay. So alright. So now we we need

633

01:16:00.700 --> 01:16:10.092

Village of Parish: in order for us to get any more money from New York State. We have to be the pro housing community. And I remember that, yeah, we talked about that months ago, and I forgot about that. So

634

01:16:10.440 --> 01:16:13.670

Village of Parish: I sent in our letter of intent, and they sent me back

635

01:16:14.160 --> 01:16:16.040

Village of Parish: legible some sort.

636

01:16:16.866 --> 01:16:24.540

Village of Parish: So what they were asking for and what they have been waiting for something from our code officer

637

01:16:24.720 --> 01:16:28.429

Village of Parish: talking about how many permits have been given for new housing.

638

01:16:28.510 --> 01:16:32.281

Village of Parish: There's been no new housing applications anymore.

639

01:16:33.710 --> 01:16:37.220

Village of Parish: anyway. So if we pass this resolution.

640

01:16:37.380 --> 01:16:41.949

Village of Parish: say it and then talk to Kevin about this. So we have to give it to our planning

641

01:16:42.010 --> 01:16:46.340

Village of Parish: or to say yes. Well, we're gonna try hard to get new housing in the village.

642

01:16:47.000 --> 01:17:04.273

Village of Parish: That's the second step I have to get for us to become designated as a pro housing, and what are the benefit from being pro housing money?

643

01:17:05.050 --> 01:17:06.450

Village of Parish: I'm I want to

644

01:17:07.040 --> 01:17:09.030

Village of Parish: guess there was any property that

645

01:17:11.920 --> 01:17:12.600

Village of Parish: the

646

01:17:13.010 --> 01:17:19.559

Village of Parish: but that he just told me. I can't only have one

647

01:17:21.830 --> 01:17:22.490

Village of Parish: that

648

01:17:23.330 --> 01:17:26.309

Village of Parish: I I have a 3 big 3 yard there are a night

649

01:17:27.520 --> 01:17:28.879

Village of Parish: I don't know.

650

01:17:29.570 --> 01:17:42.290

Village of Parish: May. Maybe it's just basically not all make deals, and that we're not gonna stop basically

651

01:17:43.520 --> 01:17:44.190

Village of Parish: morning

652

01:17:44.360 --> 01:17:46.519

Village of Parish: inhibit anybody that you.

653

01:17:47.640 --> 01:17:51.317

Village of Parish: So what this is really is

654

01:17:53.410 --> 01:17:55.800

Village of Parish: currently something less than 200.

655

01:17:56.130 --> 01:18:10.119

Village of Parish: There's not that many big sewer users not like when we have the school explore something. What I'm saying? Structures, yeah, and bills going out the door, regardless of how many units I get. 207 bills. Knock off the 9 that have already been

656

01:18:10.720 --> 01:18:13.330

Village of Parish: previous boards. Forgave any sewer fee on them.

657

01:18:13.620 --> 01:18:19.480

Village of Parish: I'm down to 198 bills going out the door. I'm just trying to come up with something where we say that

658

01:18:20.010 --> 01:18:20.730

Village of Parish: 5th

659

01:18:23.550 --> 01:18:27.672

Village of Parish: filing, everything we tend to recruit, you know, like, in other words.

660

01:18:32.920 --> 01:18:34.250

Village of Parish: our helpers.

661

01:18:35.110 --> 01:18:38.800

Village of Parish: good agencies. When you give a statistics.

662

01:18:39.290 --> 01:18:50.309

Village of Parish: they like that. Yeah. Yeah. Cause they did. Yes, we do. On the old 100 acres up on the grizzle behind. Grizzly.

663

01:18:51.576 --> 01:19:13.059

Village of Parish: Yeah. So multi family affordable housing further housing. That's all great. As long as they're not landlords, you know. I I you know cheap, cheap, cheap, cheap, cheap apartments are great. Maintain the building, and, you know, don't cause that's just sad. It's the housing crisis is is in. Our country is disgusting, and

664

01:19:13.420 --> 01:19:39.480

Village of Parish: the gap between the the wealthy and the poor is getting bigger and bigger. So we we want to be on the good side of things and say we support housing, for, for you know, low income individuals as long as it's on a slum lord by not maintaining a place and living in unsafe conditions. So it sounds like, we all accept this resolution.

665

01:19:39.590 --> 01:19:45.876

Village of Parish: Okay, I make a motion for pro housing communities. Model resolution.

666

01:19:46.900 --> 01:19:49.350

Village of Parish: I second that motion.

667

01:19:50.230 --> 01:19:50.910

Village of Parish: Pardon me

668

01:19:53.460 --> 01:19:55.100

Village of Parish: all in favor.

669

01:19:56.292 --> 01:19:58.337

Village of Parish: Hi! Alright!

670

01:19:59.370 --> 01:20:00.559

Village of Parish: There's only no

671

01:20:01.110 --> 01:20:28.790

Village of Parish: good. I don't see a catch in that. So there's a conflicting oh, I don't know, may I? Probably I'm being wrong because I'm not as a lawyer. Of course, here it says it says we reserve the right to amend the agreement through project completion, which is.

672

01:20:28.790 --> 01:20:38.403

Village of Parish: find the one phrase, but also there's another one well, and it says that they can raise the \$160 fee based on whatever the

673

01:20:39.177 --> 01:20:48.729

Village of Parish: Us. Bureau of Labor Statistics. So, assuming that they say Yes, there, but it also in this contract. It says the fees may be adjusted annually.

674

01:20:48.750 --> 01:20:51.069

Village of Parish: so come, talk to us next.

675

01:20:51.130 --> 01:20:53.529

Village of Parish: and when there's a budget.

676

01:20:55.781 --> 01:20:59.469

Village of Parish: So the last time actually was December 20th

677

01:20:59.960 --> 01:21:21.209

Village of Parish: for wastewater and water project. So these, these new ones that we got waste water. Somebody said that they wanted to raise 160 to 165. But is that, 1st of all, that has to be under the Us. Euro labor statistics consumer pricing that.

678

01:21:21.752 --> 01:21:32.230

Village of Parish: So that's my 1st question. That's a fiat from above that. What if if it says part of the government changes the number, then

679

01:21:32.340 --> 01:21:46.080

Village of Parish: that's what they're gonna charge right? But then they're not controlling. But the next line says, Yeah, not that I know that, but, in other words, if they didn't raise it from 160 to 165. But assuming they did it just says the fees may be adjusted annually.

680

01:21:47.580 --> 01:21:51.390

Village of Parish: then I use the word annually. This is so. So 24.

681

01:21:54.930 --> 01:22:06.399

Village of Parish: So yeah, that's what I was trying to correct, because I only have one of the December. Then I have December to the new fees.

682

01:22:06.787 --> 01:22:19.790

Village of Parish: Well, we always have the right to say, no. Steven brought up. The fact is saying, Yeah, just the the contract does say they

can raise the fees, but it also has the thing that it's supposed to be in the

683

01:22:20.289 --> 01:22:26.400

Village of Parish: Us. Bureau of Labor and Statistics consumer price. And it also says annually, so I don't. Here's the

684

01:22:26.900 --> 01:22:29.480

Village of Parish: I mean, there's the contract. So I mean it's

685

01:22:30.269 --> 01:22:52.230

Village of Parish: so. I think the big. The best thing with them is you tell them you want you want them to justify, and then tell them, and then come up with a reason why I can't wait for the next end of summarize the reasoning behind it rather than just so it's on hold.

686

01:22:55.170 --> 01:23:02.649

Village of Parish: Okay? So that's that one. Okay, the manhole cover bit, Scott. I mean, you heard what the

687

01:23:03.410 --> 01:23:21.190

Village of Parish: our experience people said, if I added this right, if you looked at, I think their proposal is \$17,175, 17,000, if I added it right and cause I tried. There was 2 things that had the same price. But it looks like it's 2 different locations. It's 5 things.

688

01:23:22.296 --> 01:23:39.930

Village of Parish: And the one page letter which is kind of vague on you have. It's like a picture of a picture. Yeah. And it's addressed to the tower of parish administratively, definitely, more 8,000 difference.

689

01:23:40.253 --> 01:23:45.586

Village of Parish: But if we go with, we're we're we're heading into the budget. Here. We have a

690

01:23:47.362 --> 01:23:55.717

Village of Parish: a budget for this stuff, right? And I don't know that it's \$17,000.

691

01:23:56.320 --> 01:23:58.536

Village of Parish: The building site is that's

692

01:23:58.990 --> 01:24:12.100

Village of Parish: it's not well, it could be the equipment line equipment maintenance. How do you want to classify a pipe. Is it equipment? Well, it's infrastructure. It's correct.

693

01:24:12.250 --> 01:24:27.110

Village of Parish: I don't. It's facilities that of some kind, right? Equipment. Yeah, maintenance maintenance. Because stuff gets old and you have to replace it. Maintenance? Yes.

694

01:24:29.210 --> 01:24:33.567

Village of Parish: how much is in that line? I don't know. I'm not looking at the 1st question.

695

01:24:33.860 --> 01:24:37.080

Village of Parish: also, in the process of getting close out the 1st time.

696

01:24:37.710 --> 01:24:44.986

Village of Parish: How do I know about this guy? This guy was one that Tajia had reached out to? And this Guy used to work with.

697

01:24:45.800 --> 01:24:54.279

Village of Parish: and then, like I said, I don't wanna could just have a smaller business. And

698

01:24:54.330 --> 01:25:20.859

Village of Parish: last overhead he seems a little bigger. He's got some admin. I mean, if he's out there working all day, he's got somebody to make, you know, full proposals on each of the things they've looked at each of the things. My feeling is

699

01:25:20.860 --> 01:25:26.770

Village of Parish: this guy's gonna go in there and discover that to say nearly enough money to do what needs to be done. He's gonna do a half assed job.

700

01:25:27.140 --> 01:25:48.709

Village of Parish: So anyway, to fix my concern, too. So maybe if he I mean he would, maybe you could do a more thorough assessment of each.

701

01:25:49.560 --> 01:25:51.680

Village of Parish: They just said they were too busy to do

702

01:25:51.880 --> 01:25:53.220

Village of Parish: Gotch. Well.

703

01:25:53.320 --> 01:26:04.269

Village of Parish: we tried right, and and they do recommend. I mean, I just the price was a little bit less on this. It would be a much easier choice. How how does the price of

704

01:26:04.450 --> 01:26:07.730

Village of Parish: the word competitors proposing compare with what we've already paid him to do.

705

01:26:08.070 --> 01:26:26.549

Village of Parish: It's in line 1, 5,275, because he looked at it and said, Oh, my God, it's a

706

01:26:26.952 --> 01:26:33.109

Village of Parish: that was one of the things that gave me some confidence to want to go with Jake, because

707

01:26:33.360 --> 01:26:35.750

Village of Parish: this one's this, what's the next one's the same.

708

01:26:36.520 --> 01:26:38.230

Village of Parish: But then things

709

01:26:39.580 --> 01:26:40.510

Village of Parish: start the

710

01:26:41.440 --> 01:26:42.300

Village of Parish: let's

711

01:26:42.620 --> 01:26:46.229

Village of Parish: half again. More. Because, oh.

712

01:26:46.440 --> 01:26:47.490

Village of Parish: is it actually

713

01:26:48.410 --> 01:26:49.270

Village of Parish: freaking

714

01:26:53.720 --> 01:26:54.490

Village of Parish: Darrell?

715

01:26:57.140 --> 01:26:58.020

Village of Parish: No one.

716

01:26:58.650 --> 01:27:02.689

Village of Parish: It's down Church Street Street, including all the way down to Uni.

717

01:27:24.690 --> 01:27:25.580

Village of Parish: How could be

718

01:27:25.850 --> 01:27:29.320

Village of Parish: doesn't survive. Tim doesn't survive, did what he could

719

01:27:29.550 --> 01:27:31.300

Village of Parish: need to make that motion

720

01:27:32.120 --> 01:27:32.860

Village of Parish: behind it.

721

01:27:34.380 --> 01:27:35.820

Village of Parish: 2 seconds.

722

01:27:37.320 --> 01:27:38.270

Village of Parish: They're Edward.

723

01:27:39.063 --> 01:27:48.399

Village of Parish: I'm into having the middle ground. i i i'd like to double the prices is hard. Maybe a 3rd one would make it double the prices more manholes

724

01:27:48.520 --> 01:27:53.540

Village of Parish: than before. It does. No, no, no, I mean twice the price of the other. Quote, right? But I

725

01:27:53.820 --> 01:27:56.309

Village of Parish: it's just if we had a 3rd one

726

01:27:59.045 --> 01:28:05.034

Village of Parish: more reference point, and might make it easier to

727

01:28:06.300 --> 01:28:24.796

Village of Parish: yeah small area. I am inclined to to go with this just like you said, this seems a little too low compared, you know, being that there is 5.

728

01:28:27.370 --> 01:28:41.203

Village of Parish: So you know. And then last year I took so much heat because I think people said my I was friends with Jake. He's not my enemy, but then I dealt with him.

729

01:28:41.750 --> 01:28:49.889

Village of Parish: Oh, he's a firefighter, too. The more I learn about him, the more I like him. He's a part of the community I mean.

730

01:28:50.170 --> 01:29:03.285

Village of Parish: he's not too far away, this other guy, you know, but he's not as close still, in our county.

731

01:29:04.480 --> 01:29:26.398

Village of Parish: He's got a West Macro address, I believe. Oh, he's still. Oh, he's in the town of parish. Yes, oh, so he's in our actual building, I was thinking he was not even in our in our town. The criteria I normally use. I I like to support local business first.st

732

01:29:28.852 --> 01:29:47.529

Village of Parish: This is very good. He's putting the time in here on I I I second the motion to accept Jp. Enterprises quotes on all 5 of these, he's done great work for us in the past. He's highly recommended by a competitor, and like like Tom had mentioned, and and and Scott, you know

733

01:29:47.530 --> 01:30:07.271

Village of Parish: the we know it would be done a certain way otherwise it'll cause more problems in the long run. And then then the sewer, the volume of water, and everything. You know we we can't risk can't risk it with the new vendor.

734

01:30:08.304 --> 01:30:15.840

Village of Parish: We voted that we would switch the lawn sales to the week before Memorial Day, because many people are gonna ask me to switch.

735

01:30:16.030 --> 01:30:30.818

Village of Parish: Okay. Garage sale. Yes, about the day of the law, or just about how you can conduct a garage can't start a store in your front yard in the middle of it. So, anyway. So then other people were mad about it, and they said that

736

01:30:31.540 --> 01:30:34.750

Village of Parish: they were. They had sale on Memorial Day as well as

737

01:30:35.510 --> 01:30:39.303

Village of Parish: one week before, and I came in with the thought that

738

01:30:39.800 --> 01:30:41.910

Village of Parish: Well, you know, if the fire chief

739

01:30:42.090 --> 01:30:45.470

Village of Parish: and one of the town councilmen are having a long sale at their

740

01:30:46.390 --> 01:30:47.100

Village of Parish: how

741

01:30:49.097 --> 01:30:53.122

Village of Parish: how can I enforce a lot? However, we have the gentleman across the street.

742

01:30:53.987 --> 01:30:58.880

Village of Parish: the one he's come in already this year for free for maps.

743

01:30:59.110 --> 01:31:02.870

Village of Parish: and we told Rosemary told him that he could only do 3 a year.

744

01:31:03.180 --> 01:31:06.270

Village of Parish: I heard her tell him that.

745

01:31:06.410 --> 01:31:08.629

Village of Parish: So he had the sales off.

746

01:31:08.770 --> 01:31:09.620

Village of Parish: Dave.

747

01:31:11.060 --> 01:31:11.910

Village of Parish: isn't it?

748

01:31:12.540 --> 01:31:15.659
Village of Parish: He's having a cell.

749
01:31:16.195 --> 01:31:25.570
Village of Parish: our local law from 2,000. We know what happened. One of the women on Church Street used to have it all summer long.

750
01:31:33.190 --> 01:31:36.182
Village of Parish: Why do? I wouldn't want all that

751
01:31:37.540 --> 01:31:47.930
Village of Parish: any individual might buy not less than \$25, no more than \$500 for each of phones.

752
01:31:48.020 --> 01:31:50.309
Village of Parish: you know. I don't think I'm

753
01:31:50.910 --> 01:31:54.627
Village of Parish: I'm meeting. Good. The thing is, it's like,

754
01:31:55.990 --> 01:31:58.030
Village of Parish: that's 1 day

755
01:31:58.850 --> 01:32:00.870
Village of Parish: it's somebody that's like

756
01:32:01.500 --> 01:32:10.639
Village of Parish: owns are crepted like me. It's gonna die. And like, you know, and I just wanna start moving some of my stuff out

757
01:32:11.110 --> 01:32:15.179
Village of Parish: intent is somebody running it as a business versus somebody just trying to?

758
01:32:15.917 --> 01:32:26.449
Village of Parish: Yeah, yeah, like, if they're just buying buying infomercial stuff and selling it out front all summer long. That's a yeah. So

759
01:32:26.580 --> 01:32:36.629
Village of Parish: would you like me just to mail him a copy of this law? Tell him what? Tell him he could request a waiver and come in from. We could get a business permit.

760

01:32:36.820 --> 01:32:39.484

Village of Parish: Oh, there you go!

761

01:32:40.190 --> 01:32:42.849

Village of Parish: Oh, yeah, then you get it at these zones

762

01:32:42.860 --> 01:32:47.179

Village of Parish: the cell there. It's probably commercial there. I think

763

01:32:48.030 --> 01:33:00.949

Village of Parish: so I can start selling stuff in, I'm thinking. When we rezoned you rezoned that one little track open, Lewis. They were surrounded by commercial. I don't remember what was across the street there.

764

01:33:01.030 --> 01:33:22.727

Village of Parish: You said this. This one's across the road

765

01:33:25.734 --> 01:33:31.625

Village of Parish: you know, permanent regular basis that it seems like you have a business here, you know, and then and then

766

01:33:32.334 --> 01:33:40.389

Village of Parish: If that's his intention, or if, like, Jack said, he's just like, Hey, I'm just trying to get all this stuff on my garage. No one's buying it and then be like, Oh.

767

01:33:40.470 --> 01:33:43.879

Village of Parish: lower your prices and cut down. How

768

01:33:44.160 --> 01:33:44.930

Village of Parish: hello!

769

01:33:45.270 --> 01:33:46.310

Village of Parish: Pretty good

770

01:33:47.730 --> 01:33:50.120

Village of Parish: dude! I was trying to run out

771

01:34:17.790 --> 01:34:19.100

Village of Parish: alright. Alright.

772

01:34:22.400 --> 01:34:23.130

Village of Parish: and we can

773

01:34:23.680 --> 01:34:24.820

Village of Parish: hey? Hello!

774

01:34:26.940 --> 01:34:29.480

Village of Parish: Seeing that time of year again. Looks

775

01:34:30.720 --> 01:34:35.019

Village of Parish: actually this year I'm I don't think it's gonna be good.

776

01:34:35.460 --> 01:34:36.520

Village of Parish: That is normal.

777

01:34:37.300 --> 01:34:41.409

Village of Parish: But my freedom right now you're looking at what I close out for the month makes. That's what I'll start with any.

778

01:34:42.679 --> 01:34:46.630

Village of Parish: So I need a authorization. Or yes, I need authorization to

779

01:34:46.680 --> 01:34:52.250

Village of Parish: 0 out. The overdrawn balance is because the compost office doesn't like. They don't like reality.

780

01:34:52.950 --> 01:34:57.849

Village of Parish: They they don't want taking numbers on your butt.

781

01:34:57.930 --> 01:34:59.409

Village of Parish: we? We always

782

01:34:59.690 --> 01:35:02.020

Village of Parish: and on this line. What would you do

783

01:35:02.950 --> 01:35:03.830

Village of Parish: by accurate.

784

01:35:04.870 --> 01:35:06.519

Village of Parish: That's not necessary. Number one

785

01:35:06.910 --> 01:35:09.330

Village of Parish: authorized authority.

786

01:35:16.290 --> 01:35:20.450

Village of Parish: Yeah, O h. We don't mind. I will make that motion.
I'll try. And

787

01:35:20.740 --> 01:35:25.430

Village of Parish: 10 basic transfer transfer monies to 0 out the open
door online. A. Sec.

788

01:35:25.870 --> 01:35:28.486

Village of Parish: Alright, I'm in favor.

789

01:35:30.370 --> 01:35:31.349

Village of Parish: We do this all.

790

01:35:31.580 --> 01:35:33.699

Village of Parish: Yeah, yes, every year.

791

01:35:33.780 --> 01:35:36.250

Village of Parish: PIN code and item number 2 of us.

792

01:35:36.370 --> 01:35:37.350

Village of Parish: I

793

01:35:37.640 --> 01:35:38.650

Village of Parish: did manage.

794

01:35:38.780 --> 01:35:40.400

Village of Parish: transfer the

795

01:35:40.590 --> 01:35:42.080

Village of Parish: 26,000,

796

01:35:42.170 --> 01:35:45.270

Village of Parish: 5,000 we need to be, do enterprise account.

797

01:35:45.880 --> 01:35:49.709

Village of Parish: And the 3 0. 6, 5 went from the sewer over

798

01:35:50.170 --> 01:35:51.080

Village of Parish: today. It's

799

01:35:52.010 --> 01:35:54.130

Village of Parish: it was part time, right?

800

01:35:54.440 --> 01:35:55.620

Village of Parish: Infrastructure, upgrade account.

801

01:35:57.130 --> 01:35:58.770

Village of Parish: It's all those bottles. But

802

01:36:01.330 --> 01:36:02.719

Village of Parish: autos in the folder

803

01:36:03.990 --> 01:36:05.680

Village of Parish: Chris is on to.

804

01:36:07.871 --> 01:36:09.779

Village of Parish: I did. This is like.

805

01:36:11.020 --> 01:36:12.739

Village of Parish: has a redundant.

806

01:36:12.920 --> 01:36:13.690

Village of Parish: It is.

807

01:36:15.280 --> 01:36:16.000

Village of Parish: Yeah.

808

01:36:18.790 --> 01:36:23.360

Village of Parish: But I'm here. I make a motion that we accept general fund out

809

01:36:24.350 --> 01:36:27.550

Village of Parish: one through one pm, yeah, I'll be 47,

810

01:36:28.540 --> 01:36:35.164

Village of Parish: and the reason number twenty-sem is under is because I had written the chip table, and then, in the process of

811

01:36:37.620 --> 01:36:39.969

Village of Parish: so with the clerk, had one in the wrong spot.

812

01:36:41.160 --> 01:36:41.959

Village of Parish: we hope.

813

01:36:42.900 --> 01:36:45.770

Village of Parish: but now I was able to read number. But then.

814

01:36:47.630 --> 01:36:50.159

Village of Parish: because you only need 3 h. That's great.

815

01:36:52.135 --> 01:36:52.480

Village of Parish: It's

816

01:36:56.380 --> 01:36:57.080

Village of Parish: twice

817

01:36:59.360 --> 01:37:01.190

Village of Parish: that is not accounted for.

818

01:38:49.040 --> 01:38:51.069

Tom Bullard: And good night all. Thank you.
